

Editor Gives First Hand Account Of Earthquake

Editor's Note: This article was written by Mrs. Babb who has recently returned from Japan where her husband, Lt. Jesse Babb is stationed with the Marines. By PHYLLIS BABB

At times Japan can be terribly exciting! Today we in fact, got "shook up."

I awoke this morning to severe rattling of windows. Thinking that a storm must surely be brewing. I looked out and saw to my com-

plete astonishment that the skys were clear, the sun shining and the "re-wash" so much as a breeze.

Then, with horror, I realized that not only were the windows rattling but indeed, the floor rolled beneath my feet.

An earthquake!

The earthquake rocked most all of northeast and central Honshu at 6:24 a.m. Seismographs in the Tokyo area reported a weak "two" out of a possible "seven."

At Mitu, where the quake was far more intense, seismographs registered a strong "five" out of the possible "seven."

The earthquake was said to be some 75 miles off of Tokyo. No major damage or injury was reported.

There is no doubt in my mind that earthquakes are fearful things.

Andrews PTSA Meets At High School

NEWS—Over one hundred persons attended the regular meeting of the Andrews Parent-Teachers-Student Association held in the auditorium of the Andrews High School Tuesday evening at 7:30 p.m.

Mrs. Gerald Almond, president, presided.

The devotion was given by Brenda Stover and Ronald Kilpatrick. A film was shown by Sam Webb on the ten-point safety program.

Patrolman E. N. Hooper explained the new point system law. He asked the cooperation of the people in the community in helping to carry out the safety program. A school patrol is being organized by the PTSA.

Recommendations of the council were approved and reports were heard from the standing committees.

The regular meetings will be held the second Tuesdays in each month with the exceptions of the January and May meetings it was announced.

Mrs. Annie S. McGuire, membership chairman, collected dues.

Mrs. H. A. Van Gorder's eighth grade room won room center in the elementary grades with Mrs. Aline Bristol's room winning in the High School.

It is a feeling of complete helplessness that overcomes you as you see the earth moving and your shelter rumble.

The quake this morning could not have lasted more than 30 seconds.

It seemed more like 30 years to me.

Even though this was a fairly minor earthquake and lasted a short time, I fully realized how insignificant one can feel.

I found a million things running through my mind.

The main thing that I thought was, "How long is this going to last and what can I do?"

The Japanese seem to take these occasional quakes pretty much in their stride.

But to me, this was an experience I won't soon forget.

Fewer Drownings Reported This Year By TVA

Thus far this year there have been eleven fewer accidental recreational drownings in TVA lakes than during the same period in 1958, TVA reported. Fifty persons have lost their lives during the first nine months of 1959 while using the lakes for boating, swimming, or fishing. At this time a year ago 61 had succumbed.

TVA said it is too early to conclude from this marked improvement that the water safety programs many agencies carry on is beginning to bring results. It added, however, that the drop in such drownings represents "an unusually large gap," considering that use of the lakes is rising.

Loss of life has been greater this year than last on Guntersville, Pickwick, Hales Bar, Cherokee, Watts Bar, Douglas, Great Falls, South Holston, and Watauga. Chickamauga, Boone, and Fontana have had the same number of recreational drownings so far this year as last.

RAILROAD FEATHERBEDDING:

\$500,000,000 LOSS

TO THE NATION—INCLUDING YOU—EVERY YEAR

Featherbedding on the railroads — pay for work not done or not needed — is costing the American people the shocking total of more than \$500,000,000 a year.

You pay for it every time you shop, because featherbedding costs are hidden in the price of everything you buy.

Obsolete union work rules, involving the railroad operating employees, are responsible for this gigantic burden. Right now, for instance, these rules require every diesel locomotive to carry a fireman—even though diesels have no fires to stoke, no boilers to tend.

The forthcoming negotiations between the railroads and the unions are urgently important to the whole nation.

In asking the unions to drop these featherbedding rules, all the railroads ask for is a fair day's work for a fair day's pay.
