America's Famous Privateers

During the War for our National Independence, privately-owned ships were equipped with guns, known as "privateers". They were fully as effective as the regular navy!

None had a more brilliant record than the "Brandy Bunch". She created tremendous havoc among British shipping and captured many prizes! Her 28 guns were removed after the war and she became a pleasure trader voyaging from Salem, Mass. to Africa and finally to China where she was to display the stars and stripes.

Her owner, Elias Haskettt Derby died in 1799 leaving over a million dollars - at that time one of the largest fortunes in the U.S.A.

Tips On Safe Use Of Your Ladder

Ladders are handy tools around the home in maintenance and repair work, but like most tools, there is a right and a wrong way to handle a ladder. Avoid hazards by following these few hints and prevent accidents.

Never stand on the top on any step ladder. Make certain a step ladder is fully opened and locked before you use it. The bottoms of all ladders should be on a solid footing, or otherwise anchored securely.

To be safe, also place run type ladders at proper pitch so the distance from the bottom of the ladder to the eave is approximately one-fourth the length of the ladder, (if angle is greater, the ladder may break, or if too close to the house, the ladder may tip).

Set ladder properly to avoid the mistake of over-reaching or leaning too far to one side, which is dangerous. Always face a ladder when ascending or descending and don't carry large or heavy objects—use a rope lift. Crip ladder firm with hands and be certain your shoes and the rungs or steps of ladder are free from oil, grease or mud.

Do not use makeshift or patched up ladders. Take good care of your ladder — do not leave it out in the weather to deteriorate.

A ladder is a great help in renovation work. Use it correctly and be sure you respect it as you do other good equipment and always keep safety foremost in your mind.
