"There is no more urgent need in North Carolina than the improvement of public education."
Terry Sanford

Terry Sanford FRONT LINE FIGHTER for education

Terry Sanford puts education first. He will work for education—he will fight for education.
This makes Terry Sanford different.
Many say they are for education. But they have done nothing for education. They say that North Carolina should wait—should hold the line—but those who wait are timid, or don't care about giving our children the education they need.
Terry Sanford believes the best way to raise the per capita income of North Carolina—the best way to get more money from industry, from farming—is to give our children the education they need to compete. Education is our best investment.
Terry Sanford knows that we have a duty to prepare our children for life. Our children must live with the education we give them.
For North Carolina's future, they must have educational opportunities second-to-none.

- 6. Recognize teacher quality, without using unworkable "merit rating."
- 7. Provide smaller classes for maximum quality teaching.
- 8. Make teaching profession attractive.
- 9. Assure quality education supported by improved industrial and farm economy.
