Words of Life

Rev. D. P. Smotherman
 Pastor
 First Methodist Church
 Andrews, N. C.
"THE DIMENSIONS OF LIFE"
 All of us in moments of quietness and meditation think about life, its dimensions and meaning. What is life all about? How can we measure our lives?

A man's life is measured, first of all, by its length. Everyone who reads the Bible remembers the name of Methuselah. "Old as Methuselah" has become a by-word. Methuselah was 969 years old when he died, and has become the symbol of longevity.

Every normal and sane person wants to live as long as he can. A cartoon recently pictured an elderly man saying to the young nurse who is trying to console him, "Stop saying I will live to be 90, I am 90." There is beauty and blessing in long life. One of the promises to the righteous man in the Psalms is, "With long life will I satisfy him."

Christian people should look upon life itself as a blessing. They should think of it as a gift and trust from God, and try to deal wisely with it. The body is the temple of God, and we should learn to take care of our bodies and indirectly of life itself. Paul said, "Present your bodies as a living sacrifice, holy and acceptable unto God." We must learn to make the best use of bodies. We cannot be the best Christian, if we drive ourselves beyond all limits. However longevity is not all there is to life. Methuselah lived 969 years and that's all we know he ever did. His life was long but thin as a string.

Life needs to have breadth. Robert Louis Stevenson once said, "The world is so full of a number of things, some people let their minds sink into narrow grooves. Pre-occupied with petty things they do not cultivate new interests. Life grows unnecessarily cramped and drab."

A Christian can be a better Christian if he is a well informed Christian. We need to

LEGAL NOTICE

NORTH CAROLINA CHEROKEE COUNTY
 The undersigned, having qualified as Executor of the Estate of O. C. Clore, deceased, late of Cherokee County, this is to notify all persons having claims against said estate to present them to the undersigned on or before the 29th day of September,

1961, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment to the undersigned at Route 2, Culberson, North Carolina. This the 27th day of September, 1960.

IN MEMORY OF

In Memory Of
 Mrs. C. N. Amos
 Elaine Kilpatrick Amos, wife of C. N. Amos, was born at Marble, N. C., October 8, 1919, and died August 1, 1960. At an early age, she joined the Red Marble Baptist Church, and at the time of her death she had moved her membership to Level Cross Baptist Church. She was a faithful church worker, a loving mother and wife, and a friend to all who knew her. She is greatly missed by all who knew and loved her.

A WONDERFUL MOTHER
 God made a wonderful mother. A mother who never grows old; He made her smile of the sunshine, And He molded her heart of pure gold; In her eyes He placed bright shining stars, In her cheeks, fair roses you see; God made a wonderful mother, And He gave that dear mother to me.

Lack of Fluoride Deprives Health Protection

Dentists and medical officials in this area and throughout the nation are convinced that many children now growing up are deprived of lifelong health protection because their elders have failed to take the necessary action to adjust the fluoride content of public water supplies to the level recommended by responsible medical, dental, and public health scientific organizations.

The N. C. Health Bulletin recently published a singular statement. Throughout their lives these children will suffer more tooth decay and will lose more permanent teeth than children who have the good fortune to live in communities where the water contains the optimum amount of fluoride. Respectable scientific research has proved that the addition of fluoride to water supplies deficient in this mineral is a safe, beneficial, practical, and inexpensive public health measure.

All people served by this newspaper, living in the communities where water supplies are deficient in fluoride are urged to take necessary action to remedy this situation as soon as possible. The Scout will welcome comments on this subject.

High School Education Worth \$60,000

A young man who leaves high school to earn enough money to buy a hot-rod, for example, is making "a major financial miscalculation in the neighborhood of \$60,000. A recent U. S. Department of Labor study shows that the value of a high school education over a grade school education can be estimated at \$64,000 in a lifetime, and that of a college education over a high school education at \$100,000.

A young man starting out in 1960 can expect to earn about \$900,000 during his life—more or less depending on his education. Thus, the average lifetime earning potential of the grade school graduate is estimated at \$179,000, of the high school graduate at \$243,000, and of the college graduate at \$343,000.

School drop-outs experience more unemployment than graduates. Among youths interviewed for the study, unemployment was three times as heavy among the boy dropouts and four times as heavy among the girl drop-outs as it was among the graduates. Some of the drop-outs had been unemployed as much as 27 percent of the time since they had left school.

Announcing the 1961 Ford...
 Beautifully proportioned to the
CLASSIC FORD LOOK

An honor to be proud of, this is the medal presented by the international fashion authority, Centro per l'Alta Moda Italiana, to the 1961 Ford for functional expression of classic beauty.

BEAUTIFULLY BUILT TO TAKE CARE OF ITSELF

The 1961 Ford introduces a whole new concept of what a car can do for you... and for itself!

It lubricates itself. New nylon bearings and a newly developed lubricant keep the '61 Ford neatly greased for 30,000 miles. It cleans its own oil. The 1961 Ford's Full-Flow oil filter lets you go 4,000 miles between oil changes.

It adjusts its own brakes. A "mechanical brain" keeps brakes adjusted for the life of the lining.

Rust? Ford's body is specially processed to resist corrosion, even to galvanizing body panels beneath doors.

Ford takes care of itself on the turnpike, too, with a new 390-cu. in. Thunderbird Special V-8 that has all the punch you'll ever need. The 352 Thunderbird Special V-8 and 292 Thunderbird V-8 thrive on regular gas. And, for top economy, you can choose the '61 Mileage Maker Six.

This is the 1961 Ford... beautifully proportioned to the Classic Ford Look... beautifully built to take care of itself.

HERE'S HOW THE '61 FORD TAKES CARE OF ITSELF

LUBRICATES ITSELF. You'll normally go 30,000 miles without a chassis lubrication.

CLEANS ITS OWN OIL. You'll go 4,000 miles between oil changes with Ford's Full-Flow oil filter.

ADJUSTS ITS OWN BRAKES. New Truck Size brakes adjust themselves automatically.

GUARDS ITS OWN MUFFLER. Ford mufflers are double-wrapped and aluminized—normally will last three times as long as ordinary mufflers.

PROTECTS ITS OWN BODY. All vital underbody parts are specially processed to resist rust and corrosion, even to galvanizing body panels beneath doors.

TAKES CARE OF ITS OWN FINISH. New Diamond Lustre Finish never needs wax.
