no driving and drinking. This

is by far the most important

contribution you can make,

Assembly convenes, write to

your legislator. Ask him to

Second, when the General

Nearly 1200 human beings Believe in your own special mashed to death last gift of long and undisturbed life if you will, but mean-

while, try this:

They died in traffic. Most of them were killed, ot in accidents, but in traf-ic "incidents" involving peed, liquor, stubborness and eneral lawlessness. As formerGov, Luther Hod-es once remärked, "There's othing accidental about a man no drinks. deliberately drinks, deliberately weeds his car through an in-

resection, and causes a But apparently so few care bout those killed on the high-

support safety proposals. It's signigicant that letters urging traffic safety are usually a That's some attitude, Worse mere trickle compared to let-

ill, the human mind refuses ters concerned with less vital believe that anything negaaction. Let your represenve will happen to the body. Examples are everywhere, tative know you want safer North Carolina highways. Third, stand behind your law haracterized by the foolish asumption that "accidents enforcement officers. Without lways happen to someone your support and encourage-

ment, police are hampered in Well, you are alive at this their efforts to provide traffic ry moment only by the very secial grace of God. protection for all.

ASC News unty Office Manager

The Cherokee County ASC office personnel mailed a let-ter to all farmers that are on the ASC mailing listinforming Stop at once all illegalties them about the initial sign-up for ACP help in the 1961 proand carelessness in your own driving. No more cheating on gram year. the speed limits, double cau-

This is very important to the farmer and we urge that farmers read this letter and come to the ASC office by January 27, if they expect to be guaranteed ACP help this year. The county office per-sonnel have tried to make the letter as plain as possible and we feel that if the person receiving the letter will read it carefully there will be no misunderstanding about the nitial sign-up referred to in the letter.

We have pointed out in the letter that this is different somewhat from the past procedure since the county comittee hoped to be able to determine from the number of requests, that are received by January 27, as to how many

### farmers plan to ask for ACP assistance.

The ACP program is the ame for 1961 as it was for 1960, with the acception of practices 1 and 2, the County Committee believe that some farmers would want to sow orchard grass or fescue with out any lading clover and this year they have madt it pos-sible for the farmer to set grass seed with out clover if he feels that he does not want the clover.

The county office personnel will get sufficient information from the farmer when he makes his request as to the kind of seed, the lime and fertilizer or other information pertaining to the other practices to be able to mail the purchase order to the farmer, as soon as the county committee has approved the request, it is our plans to mail approvals and purchase orders to all farmers that request help by February 15.

#### ASC Newsletter

The initial sign-up period under the 1961 agricultural conservation program started last Monday, January 9, and will continue through January 27. During this period is the time to request assistance on any practices that the farmer would like to carry out this spring.

The practices that are offered to farmers are:

1. Sowing a new pasture on cropland or non cropland. 2. Sowing additional grasses on cropland in crop rotation. Probably the farmer will want to put this back in row crops after two or three years. 3. Lime for farm land, on

which if it is not now in grasses and legumes, will be plant-ed to grasses and legumes in this year or 1962.

4. Contour strip cropping. 5. Planting forest trees. The farmer buys the trees and plants them and the govern-ment pays \$12,00 per acre. Improving an old stand of grasses, Lime, fertilizer, and

seed is available on this practice.

7. Tile and open ditch drainage is offered this year.

Will you committeemen urge farmers in your community to sign up during the initial sign up period. AREA STAFF CONFERENCE

The chairman of the county committee, county office manager and marketing quota clerk, attended the ASC conference in Asheville on January 10 and 11, Mr. H. D. Godfrey, State Adm, Officer, and several members of the state office staff were there. Mr. Godfrey stated that we will have a farm program for the next year somewhat similar to what we now have with pos-sibly a broader ACP program. He pointed out that tobacco is in good shape. He also pre-dicted a new wheat program, as well as corn and other feed grains. The other mem-bers of the state office staff pointed out changes in the

programs that ASC administer's at the state and county level. Measuring wheat and tobacco was discussed. The importance of getting the job correctly done and on time was stressed in the discussion.

PREMEASURMENT PREMEASURMENT Premeasurement services will be offered to burley grow-ers this year if the farmer requests it and deposits the necessary cost of getting the job done. The cost last year was \$8.00 per farm. Your county committee will set the rate for premeasurment at the next committee meeting on January 25. January 25.
