In Memory of Frank Hogsd

In memory of my boarder and dear friend for eleven years, Frank Hogsd, who died July 4, 1961. I want to tell the public and those who never really knew him like I how kind and good he was. No one with as big a heart ever lived. He was a pal, neighbor and friend to all who knew him. He could be called a good Samaritan doing God's will all the time. He will be missed by everyone who knew him. Mrs. Helen McKenzie 2923 17th St., S. S., Canton 6, Ohio

Field Health Day

Glaucoma is a major cause of blindness in the U. S. It's blinding potential, however, can be greatly diminished by early diagnosis and treatment. Glaucoma is a disease of the eye marked by increasing and increased pressure within the eyeball resulting in blindness. The testing of this pressure is a simple matter using a tonometer and should be a routine testing of all people over 40 years of age.

In California recently in a comparison of their surveys they came up with the following: Cases detected per 1,000 Glaucoma 20 Tuberculosis 1 Cancer 4

On August 25, 1961, we are holding a Field Health Day in cooperation with the Home Demonstration Clubs, Veterans, etc. of Clay Co. in Hayesville. We will have a booth set up to test for Glaucoma. The testing will be done by eye specialists and their teams.

This will offer wonderful opportunity for all over 40 years of age in that area to have a check-up.

Early diagnosis and treatment does prevent blindness. If you are having painful eyeballs, blurring, seeing a rainbow color around strong lights and dimness of vision, be sure to have this check-up. It is painless and it is FREE. Remember August 25th, at Hayesville.
