

What A Gift!

The best gifts are those that keep on giving year-round. A fine art reproduction, for instance, attractively framed, or a subscription to a special magazine can be constant reminders that you remembered someone with something special.

seventh-graders or 12-year-olds and direct them toward programs for the gifted and talented.

The talent search involved over 18,000 students and covered 16 southern and mid-western states this year, said Dr. Robert N. Sawyer, TIP director. Plans are underway to conduct a similar search next year. The 605 students invited to the state awards ceremony had to score at least 500 out of 800 points on the mathematics portion of the SAT (450 for girls), or 430 out of 800 points on the verbal portion or 52 out of 60 points on the Test of Standard Written English.

North Carolina seventh-graders in Duke University's 1982 academic talent search who obtained Scholastic Aptitude Test (SAT) score equal to those of college bound high school seniors were honored May 16 in ceremonies at the Duke Chapel.

All participants received certificates of recognition for their achievement, Sawyer said. Several participants also received scholarship and book awards.

The students took the college-level SAT last January as participants in Duke's Talent Identification Program (TIP), which seeks to identify bright

James Cedric Woods from the Pembroke Middle School received one of these certificates. he is the son of Rev. and Mrs. James H. Woods of Pembroke.

County Therapeutic Recreation Department closes due to 'Lack of Funds'

On June 30, 1982 the Therapeutic Recreation Department of the Robeson County Mental Health Center will no longer exist to offer therapeutic activities to the emotionally and physically handicapped, including the elderly, of Robeson County. This vital department will close its doors due to lack of funds!

Pembroke, Rowland, and the country roads in-between the handicapped individuals no longer will be given the professional help which encouraged their many potentials.

During the eight years of this service, literally hundreds of handicapped individuals have participated in therapeutic activities which proved that previously unknown abilities existed. In most all cases, the disabilities had limited them to an unrewarding way of life.

Although there will no longer be any therapeutics activities after June 30th, if no funds become available, the therapeutic recreation staff finds solace in the fact that for eight years many handicapped individuals enjoyed and benefited from the many activities in the physical, creative, and social categories. Literally thousands of miles have been traveled to accomplish these goals.

The Therapeutic Recreation program gave them increased self-esteem, self-confidence, socialization, alleviation of anxiety and boredom, and had stimulated a spark which gave them a newly found self-fulfillment.

To the volunteers, students, churches, media, Robeson County Health Department, social services and some political leaders, all of whom helped make the program what it is, the patients, staff, of the Therapeutic Recreation Department and the Robeson County Mental Health Center express their appreciation and gratitude.
