The Indian Education Project holds its annual 'Parents Night'

On Monday, parents of children who attend the Baltimore City Schools met together at the Baltimore Indian Center as part of the Indian Education Project's "Parents Night." The theme for the evening event was "Education: A Family Affair." According to Ms. Mary E. Brayboy, Director of the Project, the Parents Night is the culmination of the year's work and is considered to be the highlight of the program. Dr. Helen M. Schierbeck, Project Advisor, Indian Information Office in Alexandria, Virginia was the keynote speaker to the Native American parents, project staff and to visiting friends of the project.

Ms. Schierbeck spoke eloquently to the entire group in attendance. She also addressed specifically the parents of the children and then to the youth or students. Her remarks were very warmly received judging from the excited reaction of the congregation.

Also attending the meeting unexpectedly was Mr. D'Alan Huff, Division Director, Office of Indian Education, Washington, D.C. shared as to how the Baltimore Indian Education Project was the first such project he has visited since his appointment to this office. Ms. Brayboy both congratulated and thanked Mr. Huff for his thoughtfulness toward the Baltimore Project.

After being welcomed by Miss Amanda Locklear, Pro-

gram Tutor, opening remarks were made by Ms. Brayboy, followed by invocation led by Mr. Herbert Locklear. Then there was dinner.

The attendees seemed to go after the buffet style dinner with much vim and vigor.

Following the guest speaker, the attendees were grouped into four work shops. They were 1. The Role of the Parent in Education led by Herbert H. Locklear, assistant director, Dept. of Social Services; 2. Teenage Pregnancy/ Teenage Drugs, led by Mrs. Pat Bandell, Social Worker, Patterson High School; 3. The Dropout Student led by Dr. Schierbeck and 4. Behavior of the Young Child/ Effective Discipline, led by Mrs. Lynn Lazier, Psychologist, Shepard Pratt Hospital.

Entertainment during the dinner hours was provided by young Terrance Brayboy who gave an outstanding performance on the flute. Also, entertaining was Master Maxwell Hunt who gave a fine performance of traditional Indian dancing. In thanking both of these young performers, Ms. Brayboy shared that Terrance Brayboy would tour Europe this summer with a musical group.

During the "wrap-up" session that followed, many complimentary remarks were overheard about the entire evening program. One parent summed it up that "...were parents given an opportunity to be an active part of the project on a continuum, the Project would be even more successful."

Keynote speaker Dr. Helen Schierbeck as she addresses the audience.

Senior members of the group are Mrs. Maggie Dial, left, and Mrs. Lillie Locklear.

Mrs. Mary E. Brayboy welcomes Mr. Huff.

The country boy had been trying to propose to his girl a long time. Finally he got up the nerve to blurt out, "I'll betcha wouldn't marry me!" She not only called his bet but raised him three.

Pembroke's Town Clerk completes course

Ruby N. Smith, Municipal Clerk of Pembroke has recently completed the Municipal Clerks' Institute which was held at the Institute of Government in Chapel Hill. The school is held in conjunction with the International Institute of Municipal Clerks and is a three-year program towards the Certified Municipal Clerks (CMC) designation. Thirty-five clerks from cities and towns across North Carolina have completed the program which consisted of over 100 course contact hours over a three year period. Classes were held in all areas of municipal government. All instructors were Institute of Government faculty members.

To qualify for the CMC designation, a Clerk must attain 100 points in areas of experience, education, and participation in conferences and state meetings.

The three-year clerks' certification school, which began in 1980, was the first to be held at the Institute of Government.

R.J. REYNOLDS CONTRIBUTES TO EFFORT TO SAVE CAPE HATTERAS LIGHTHOUSE

The effort to save the Cape Hatteras Lighthouse received a \$30,000 boost today from R.J. Reynolds Industries, Inc., of Winston-Salem. The announcement was made by Hugh Morton, statewide vice chairman of the campaign, and John G. Medlin Jr., Forsyth County Chairman.

"The generous gift from Reynolds is a significant step toward achieving our \$1,000,000 goal," Morton said. "We hope this pacesetter contribution will spur other companies and individuals to support the project."

"This major gift is further evidence of Reynolds' exceptional corporate citizenship in North Carolina over the years," said Medlin. "It virtually assures that Forsyth County will be successful in raising its share of the goal."

"We heartily support the campaign's purposes," said J. Paul Sticht, chairman of R.J. Reynolds Industries.

"The Cape Hatteras Lighthouse is not only an important historical asset of our home state, it is also a major tourist attraction. It brings many visitors and much additional spending which help create jobs for North Carolina's people."

The tallest lighthouse in the nation, the Cape Hatteras structure was erected more than one hundred years ago in an area nearly one-half mile from the sea. Erosion and storm damage have claimed most of that area, and the lighthouse currently stands less than 250 feet from the ocean.

The fund-raising plan to rescue the Cape Hatteras Lighthouse was announced last year by U.S. Senator Jesse Helms and Governor James B. Hunt, Jr., co-chairman of the campaign.

The money will be used for improvements to prevent further erosion that threatens the structure's stability.

Thank you for the opportunity to serve as your representative in District IV of the Robeson County Board of Education for the past six years.

You vote and support on June 29 and July 27 is deeply appreciated.

BEAT THE PEAK.

10 A.M. TO 10 P.M. IS THE PEAK TO BEAT DURING THIS TIME OF YEAR

During each day there are times when the most people want to use the most electricity.

Heating, cooling, cooking, laundry. Everybody wants more electricity all at once.

It's called the Peak Load. And our future electric

rates are affected by how high these peaks get.

But we can beat the peak, if we'd all use less electricity during peak periods. And more at other times.

It's not easy changing when we use electricity. But if we do, the peak wouldn't go up quite so fast. And neither would the cost of electricity.
