An Interview on... AGONIZING ARTHRITIS

... With Dr. Harvey C. Schultz, Jr. DOCTOR OF CHIROPRACTIC

There is much concern in the press these days, as well as a great deal of rightful indignation by Doctors and patients alike, regarding so-called "cures" for arthritis. "This is as it should be," says Dr. Schultz, D.C., of the Schultz Chiropractic Center.

"Phony gimmicks and pills have been known to do arthritics out of fortunes and frequently, so-called 'arthritis drugs' have led to serious health impairments in themselves," says Dr. Schultz.

What are the early signs?
"I could go on at length," says Dr. Schultz, with medical terminology relative to the early signs. However, rather than attempting to confuse, which such advice could do, let me give you a few simple, easily understood signs to watch for:

"If you find that slight blows to your fingers of leg or elbow causes them to stiffen up slightly with some mild pain it's a danger signal.

"For instance, if a father is paly-ing catch with is son and the ball

'bumps' his thumb and the digit stiffens and hurts.

If you sleep with an arm over your forehead and you find that the shoulder joint is slightly sore in the morning, that's a sign.

If you feel a grating or popping sensation in your neck when turning your head quickly, that too, is a danger sign.

In other words, Dr. Schultz cautions that these slight changes in the joint can indicate a system ripe for arthritis attack.

"People who have stiffness or swelling, slight sore and tender spots, all should come in for a check-up. Arthritis is not something you resign yourself to. Any particular case could be effectively treated.

But time is of the essence. "Procrastination is the friend of arthritis," says Dr. Schultz. "If you feel you have a potential arthritic problem find out immediately what can be done for it. Your haste could well save you a lifetime of agonizing regret."
