Excellent Saw Mills

FOR SALE.

ONE half of a valuable Estate in Mills, built by the late Peter Mallet, Esq. and the subscriber, on Black River, below Fayetteville, on the road to Wilmington. Across the river is a permanent dam, on which are two Saw Mills, which work four saws, with each a separate running gear, and have cut 18000 feet of lumber in a week; and a Corn mill, well supplied with custom. The Mills are new and well built, are constantly supplied with an abundance of water, and protected from freshes by a natural wash way. The river extends 40 miles above the Mills; logs can be floated to them from a great distance, and rafts go from the foot of the Mills to Wilmington, 16,500 acres of Land, covered with pine, cypress and oak, and adjoining each side of the river, are connected with the Mills; 1000 acres of which of an excellent quality for rice, may be drained and watered by a dam at the wash-way. The upland abound in lightwood, and tar and turpentine may be made to advantage.—There is no situation in the State which combines equal advantages for the manufacture of pine lumber, naval stores and rice, where there is sufficient water to transport every thing to market, and the Mills are so perfectly guarded from the danger of floods. An equal undivided half of the whole property, with a few Negroes, stock of Cattle, Blacksmith's Tools, a number of Oxen, and all other things necessary about the Mills, are to be sold on a liberal credit, to suit the convenience of the purchaser. Advice to Planters of Tobacco.

THE Inspectors of Tobacco in the Town of Fayetteville, take this method to solicit the attention of those who may bring their Tobacco here for Inspection, to notice the following particulars: 1st. We advise that the Tobacco be put up in dry order, clean of dirt, and bad leaves.

2dly. We advise the people, to avoid the bad practice of mixing good and bad, long and short Tobacco together.

3dly. That the Tobacco be carefully separated; that the short and small inferior cut be stemmed and prized bright and loose. The casks must be well seasoned and the size not to exceed thirty-four inches across the head, and fifty-four inches in full length of staves. The pins in the rolled heads must be seasoned likewise and not too large, nor more than will answer the purpose.

By attending to the above, the Planters will find themselves much benefited by the price of said Article; the Inspectors will be relieved from refusing Tobacco; and the character of Fayetteville Inspection will be retrieved.

The Inspectors think it their duty to give this information in order to save trouble and expence to the Planters of Tobacco, as an alteration must be made in the business.
