JOHN CONYERS, J. P.

Smithville, March 26, 1806.

The foregoing Document, officially copied, is made public as the only alternative for satisfaction of an injured and insulted creditor, not only deprived of his just claim, but treated with ignominious language, which must be deemed bad pay.

The Reverend Nathaniel Bell, of Brunswick County, has been in the habit of preaching, what he calls the Gospel, for many years; and by the above it appears he is not unacquainted with law—I can further say, from the scurrilous epithets he was instigated to bestow on me, that certainly an evil spirit has, occasionally, access to the sanctum of his mental abilities.

RICE PLANTERS

WHO may be in want of DUPRE'S new invented PENDULUM SCREEN (under Patent) can be supplied by applying to Joshua Potts, Wilmington, or to John C. Baker near Smithville.

The Screens are warranted to sift Ninety hundred weight per day, making a complete separation of the Flour, Small Rice, Merchantable Rice, and rough or head Rice, with the labour of one hand.

They will be finished in Charleston complete in all the parts, and delivered at either place above mentioned, for fifty five dollars each, the purchaser paying the freight.—They will be so marked, and accompanied by such particular directions, that any person of ordinary capacity will be adequate to the task of fixing them for use.—The simplicity of their construction, and great durability, together with the immense saving of manual labour, and the more perfect cleaning of the grain, renders them a truly valuable acquisition to every Rice Planter.—They can for the additional charge of one dollar, be rendered so far further useful as to answer the purpose of a REEING SCREEN, which separates the rough from the ground Rice before it is put into the Mortar, and occasions a great saving of the crop. They also may be attached to any common pounding machine. Persons wishing to have them so fixed will please apply as above, and leave a description of their machine, which being made known to the proprietors, the Screen will be furnished in such a state, and with such instructions, as will enable any Millwright to put them in operation.
