### STYLE HINTS

(By Aunt Ruthie)  
You are going to have a lot of good times this summer if you wear the right clothes. Your friends may love you for yourself alone, but somehow it never occurs to them until they see you in a knockout outfit. Why not try one of the gaily flowered, crisp cotton sport dress with a matching jacket—it will make the boy friend think you are just the one for him. Another cute "dress trick" is a dark linen dress with a flowered jacket—Most girl have the idea that it is personality that counts, that men never notice what they are wearing any-

## BEAUTY AND ROMANCE by Marie Downing

MANICURES AT HOME

When you want to look your very best, there's nothing that puts the finishing touches on that dressed-up feeling better than having your nails manicured by a professional. But most girls can't afford to have that done regularly, and in between times they must care for their own nails. If it is done properly, the manicure you give yourself at home can make your nails almost as attractive as a professional treatment.

Here are a few tips that will help you do a good job:

1. You will need a long slender nail file, not too rough; an orange-wood stick; cuticle scissors, or cuticle remover; some emery boards; a nail bleaching cream; cuticle cream; polish and polish remover. If that's too big an investment, you can use olive oil instead of cuticle cream, and use pure lemon juice for a bleach, but you will need the scissors, file and orange-wood stick. It's wise to buy a fairly expensive pair of nail scissors, as the cheaper ones are frequently too dull and too poorly made to cut properly.

2. First file the nails to the desired shape. Remember what we learned in the last column—long nails are for long fingers, and shorter nails for shorter fingers. Don't soak your hands in water first, but do your filing while they are dry and the nails are stiff. Don't scrape the file back and forth, but stroke in an upward direction, toward the tip of the nail. Tilt the file toward the under side of the nail a little bit—this helps shape the nails evenly, and helps get under the corners. When the nails are shaped properly, give them a few strokes with an emery board or file downward
