NEW YORK, Dec. 30--The New York Urban League through its executive director, Jame H. Hubert has announced its annual dinner meeting on Wednesday evening, January 11, at the Roger Smith.

Chapel Hill seems convinced that Blackwell is innocent of the girl's accusations but this in no way alters the fact that he is still being held in the Durham County jail, after three weeks without a charge.

Miss Battle, who lives at 4743 Vincennes avenue, where the doctor was stabbed, broke into hysterics when questioned by police when she revealed that she and the physician had been living together as man and wife for the past six months.

She further states that the doctor came home a bout 10 o'clock Thursday morning and began abusing and beating her. She exhibited numerous bruises about her head and face to prove her statement of his abuse of her.

Negro Medics Under Great Handicaps

Belief in Current that Whole Problem of "Socialized Medicine" Will be "Smoked Out Into the Open" When Case is Called For Trial. Indigent Negro Families as Greatest Sufferers From Improper Medical Service, Bound to Profit. Broad Question Affects Medics of Both Races

By ALBERT G. BARNETT (For ANP)

CHICAGO, Dec. 28--The cent indictment by a U. S. Grand Jury in Washington, D. C., of the American Medical Association and 21 medical leaders--five of them Chicagoans--on charges of violating the Sherman anti-trust law prompts the query: "How does all this affect the Negro doctor and that vast army of Negro indigents, long suffering from a lack of medical services?"

While opinion among some physicians differed as to the immediate result of the Federal inquiry, notably current was the conviction that the forthcoming trial of the white medical leaders would smoke the entire question of socialized medicine 'out into the open' and that colored indigents would profit greatly by any compromise arrangement between orthodox medical practice and the new, "greatest good for the greatest number" medical policy now being enunciated by the Government.

THE "FLY IN THE OINTMENT" The premise upon which the white medical association is being attacked by Governmental forces lies in the failure of the medical profession to bring its services within reach of millions of the poor. On the other

hand it is charged that the association controlled the dissemination of medical services through its ability to arbitrarily dictate that only AMA physicians could hold various governmental and local positions in Federal, State county and city health units.

AMA influence went even further. Only accredited members of AMA can practice in general hospitals, sanitariums and clinics operated by cities, counties and states as well as in many private institutions.

What position will Negro medicine, as represented by the National Medical Association, take in the controversy? It is well known that Negroes represent one of the largest groups which need medical care, yet colored medics are denied an opportunity to serve them in many instances, and lose the opportunity to study which white physicians in tax-supported institutions gain through practices upon Negro indigents. Knoxville Man Succumbs

BY O. S. TAYLOR KNOXVILLE, Tenn., Dec. 29 U. S. Clark, for nearly a half century an outstanding civic and religious leader here, died suddenly last Sunday afternoon while visiting the bedside of a sick neighbor.

Clark came to Knoxville many years ago from Ohio where he was born and for a time edited a weekly newspaper here, but later was employed in the engineering department of the city water works where he served continuously for a period of forty six years and was considered a very valuable man by his superiors in that department up until his death. He was the only Negro to hold such a place here.

Clark was chairman of the deacon board, trustee-board and Supt. of the Sunday school at Rogers Memorial church; also a member of many civic organizations in Knoxville. Funeral services were held Wednesday

RALEIGH, N. C., Dec. 30th--It is probable that Attorney General Harry McMullan will recommend in the next session of the state legislature the enactment of a strict anti lynch law as well as a thorough overhauling of the North Carolina's criminal statutes.

The proposed measure will make lynching a capital offense and will provide that members of a lynch mob be charged with murder. The law will also provide compensation for families of persons lynched.

There will be another suggestion from the attorney General providing for the repeal of a mandatory death sentence for

persons found guilty and convicted of rape. The first substitute would provide that the jury be allowed to decide whether rape should be punishable by death or by life imprisonment; the second is that a crime should be punishable by life imprisonment or some lesser sentence.

Another in this group of proposed measures would provide life imprisonment for out offenders. Others would give pursuing officers in hot pursuit of a criminal permission to cross state lines.

There will be other measures introduced by McMullan and they will be largely of a technical nature.

Negro Children To Get Aid From Paralysis Program

WASHINGTON, D. C. Dec. 29--Nation wide support this year is being given the President Roosevelt Annual Ball by Negroes, due to the fact that the infantile Paralysis Association, beneficiary of this annual event had decided to turn its attention to making the benefits available to colored children.

Each year these dancing parties are promoted in various cities and communities throughout the nation, proceeds of which go to support the work of the Warm Springs foundation, pet philanthropy of President Roosevelt. Part of the money thus raised is used to defray expenses at the sanitarium but the major part is set aside for research and experimental work in combating the dread disease.

The Infantile Paralysis Ass'n has promised to establish a unit at Tuskegee Institute, where all of the research made possible at Warm Springs, will be made available for the training of Negro orthopedic surgeons and treatment of crippled colored babies and children.

Alabama and nearby states are now being treated and it is hoped the Warm Springs Foundation will make possible the installation of therapeutic pools at Tuskegee. Balls are going ahead with renewed vigor on account of the aid to Negro invalids promised by the Foundation. Colored people who heretofore have been reluctant about contributing to the President's
