

12 American Warships  
Fly Japanese Flag

San Pedro, Calif. — Twelve United States warships yesterday flew the Rising Sun flag of Japan at the after mast. Also anniversary of the founding of

in full flag display, was the Japanese naval tanker Tsurumi.

A Navy spokesman of the U. S. Navy explained this courtesy shown the Japanese tanker by participating in celebrating the anniversary of the founding of

the Japanese Empire, was in conformity with Navy tradition.

English farmer, are being urged to gather acorns, horse chestnuts, and beechnuts to eke out the feedstuff of farm animals and thereby release tonnage for other needed imports.

kept low.  
6. Keep animals free from parasites, both internal and external. Feeding parasites is always too expensive.

7. Make an effort to secure a high percentage of calves. The main causes for the low percentage of calf crops are contagious abortion, and lack of attention at breeding and calving time.

8. Conserve the manure. Since the maintenance of soil fertility is a much greater problem than can be satisfactorily met by the use of commercial fertilizers, the proper conservation of manure is an important consideration.

9. Have pigs to follow fattening cattle. One pig to two or three steers will add profit to the enterprise.

### Ten Points Given For Handling Beef Cattle

L. I. Case, Extension animal husbandman of N. C. State College, says there are 10 fundamental points in beef cattle production. He lists them as follows:

1. Beef cattle cannot be produced economically without utilizing pastures to the maximum.
2. Make use of the less saleable roughage as much as possible, especially with the breeding herd during winter months.
3. Use a purebred bull, preferably a proven sire. Not only should the bull be a good individual, but he should be of good ancestry.
4. Provide a balanced ration, including proteins, necessary minerals and vitamins.
5. Do not construct or maintain costly quarters for beef cattle. Overhead costs must be

To remove grass stains from flannels, try a mixture of equal parts of glycerine and egg white. Let the mixture remain on the stain for two hours or more, then wash garment in usual manner.

### North Carolina College Homecoming Was Colorful Event

Homecoming for the Eagles was the most colorful in its history. Miss Alice Oakley, senior and Pledgee to Alpha Kappa Alpha Sorority, was crowned "Miss Homecoming" by Dean Alphonsa Elder. She was attended by Misses Ernestine Page, Freshman; Odessa Strong, Sophomore; Doris Freeman, Junior; and Lerline Mitchell, Senior. Miss Oakley wore a grey outfit and maroon accessories. A large number of Alumni took part in the gay festivities of the Homecoming.

### Babson Predicts New Major Party

Rochester, N. Y.—Roger W. Babson, business analyst and Prohibition Party Presidential nominee, predicted last week, the birth of a successful new political party "within four to eight years."

"The time is coming," Mr. Babson declared at a campaign rally, "when the voters will cast aside both major parties and go

either to a coalition government or to some third party.

"It is up to you to see that it is a conservative third party and not some Socialist or Communist group.

The economist offered a four-point program as a guide to the Nation. It included stricter law enforcement, reorganization of the public school system, character tests for candidates for public office and "getting back to the fundamentals of American government."

Closing a 30-State, 10,000-mile tour in behalf of his candidacy, Mr. Babson foresaw 1941 as "one of the best years the country has had," and declared Adolf Hitler will not be remembered as a conqueror but as one who forced reorganization of the industrial system.

Be as anxious to help others as you are to accept favors.

Death takes no holidays—watch your driving at all times.

### Highways Are Most Costly Activity

Whether the increased production of automobiles has been responsible for the remarkable development of highways, or vice-versa, may be the subject of discussion but no one can dispute the fact that highway construction and maintenance is now the most expensive activity of State governments.

According to figures compiled by the U. S. Bureau of the Census, the proportion of State employees engaged in highway construction and maintenance varied from twenty-four per cent in the West to more than forty per cent in the South, and averages about one-third in all the states.

Assumption by State governments of the task of construct-

ing adequate highways for modern motor vehicles has resulted in the creation of large staffs of experts, administrative officials and workmen. In many states highway work is the largest governmental activity.

### Chamberlain's Body Cremated Wednesday Without Ceremony

LONDON, Nov. 14.—The body of Neville Chamberlain, former Prime Minister who died Saturday, was cremated yesterday at Golders Green mortuary in North London. There was no ceremony.

### HOME OWNERS FORUM

By ABNER GORDON

ALTHOUGH window screen wire mesh is seldom painted, when decoration is desirable a very thin coating composed of 2 parts (by volume) soft paste white lead and 3 parts of an equal mixture of boiled linseed oil, spar varnish and turpentine—either used white or tinted as desired with paste colors-in-oil—will provide the most variable, durable finish.

Brush and cross brush the paint on evenly from both sides of the screen, after which tap the frame lightly to clear the wire of excess paint which otherwise might remain to clog the pores.

When the mesh is sufficiently dry for handling, paint the frame with pure white lead and oil according to the standard practice for exterior wood.

Q.—Can shingle overwalling be applied to brick as well as wood siding?

A.—For resting plus added insulation or when brick walls are causing trouble due to leakage and moisture absorption, overwall shingles are the economical solution.

First fasten vertical siding strips to the window frames and walls with nails—specially fashioned for the purpose—driven into the mortar lines between the bricks.

To these verticals, attach horizontal strips as a shingle nailing base. The latter should be installed with a center-to-center spacing equal to the proposed exposure surface of the shingles.

Overwalling on all types of wood siding is comparatively simple, as the shingles may be applied directly, as in new sheathing. Here binding paper is required, installed as in the common practice on new construction.

Durable certified red cedar shingles—single or double course—are highly recommended to produce new style lines for modernizing old buildings.
