Health Facts

MORE THAN 20 million Americans suffer from allergies including hay fever and asthma. Even children are subject to them. Allergies are not contagious and are seldom fatal, but they can cause great discomfort and inconvenience.

20,000,000

AN ALLERGY is a sensitivity to ordinarily harmless substances called allergens. These may be tree, grass or weed pollen; dust, mold, animal dandruff, feathers or even food or drugs. In many cases this sensitivity is inherited.

NEW WAYS are being found to fight allergies. Now a recent development can provide hay fever and other allergy sufferers a full season's immunity with half the number of injections. Medical histories of patients treated with Allpyral also indicate more relief and fewer reactions. Your physician can give you further information.

The Cry is "Fire"

EACH YEAR, the President of the United States sets aside a week in October as Fire Prevention Week. It is the focus of a campaign to educate the public in ways to prevent fire. Programs are given by schools, fire departments, and other community groups. This special week is just one of the many ways we fight the terrible toll that fire can take in our country.

FEDERAL AND STATE legislatures and city councils pass fire laws and regulations in further attempts to fight fire before it starts. Fire codes are set up to prevent loss of life and property from improper building construction, and enforcement is strict.

BECAUSE OF THIS, more and more finer homes, schools, commercial and institutional buildings are using Fire Guard asphalt roof shingles. Warranted by Ruberoid for 25 years, these scientifically fortified self-sealing shingles carry the highest rating for roof surfacings assigned by Underwriters Laboratories, and their wind resistant label. What's more, they are a good looking as they are fire resistant.
