NEW YORK, N. Y.—An entirely new look in men's hair styles has emerged recently and it has been eagerly welcomed by men of all ages and in all walks of life. Variations of the Mr. Natural hairstyle are seen everywhere, for its distinguishing characteristics of virile masculinity makes it universally accepted.

The men's hairstyling staff at Posner Laboratories, New York, have just presented to the public a number of exciting new variations of the

basic Mr. Natural look. Mr. Hamilton Posner, President of the company first became interested in what has now come to be called the "Mr. Natural" several years ago on a trip to Africa.

"Truly native African hair styles would be too extreme for most Americans," Mr. Posner said, "but there was a look about them that I thought had a definite place in modern male fashion. On my return from Africa, I immediately started working with the men's hair stylists on my staff to determine how this look could be adapted to the American scene."

During the interview in his office at 38-19 108th Street, Corona, New York, Mr. Posner went on to say that he felt the Mr. Natural look was well on the way to becoming a tremendous success throughout the country. He pointed out that the styles he has created all show the versatility of this new hair fashion in its many smart, masculine adaptations.

### Personality Variations

"Each man," continued Mr. Posner, "can find the style that suits him from the group of distinguished ones that our stylists have created. Some men will prefer a more extreme style; others a more conservative look, but all of them represent fashion's forward look in men's styling. The various styles can be modified to suit a man's personality and facial contour but they all typify the virile masculinity that distinguishes the Mr. Natural look."

Inspired By African Tribe  
In calling attention to "The Watusi" style, Mr. Posner mentioned that it was inspired by the tribe of Watusi warriors known for their great height and powerful physiques. Today, "The Watusi" is favored by many college men and other forward thinkers. It is characterized by longer hair and it is shaped rounder and higher at the crown.
