First Book On James Earl Ray Due Of Press Next Week-end

NEW YORK — Many of the facts behind the James Earl Ray case that might have been revealed had their been a full trial can be found in the book "The Strange Case of James Earl Ray—The Man Who Murdered Martin Luther King, Jr.," written by Clay Blair Jr., and now being rushed to press by Bantam Books for publication next week. The paperback, the 22nd Bantam Extra, will be 256 pages and priced at 95¢.

One of the top magazine journalists and investigative reporters, Blair has been working on the book since June of last year. In the course of his research, he traveled over 10,000 miles, 5,000 by automobile in the midwest. He looked into Ray's boyhood haunts in Illinois and Missouri, and visited scenes of his crimes or arrests or trials in Los Angeles, Chicago, Kansas City, St. Louis and other places. He visited the prisons, and he retraced Ray's route through Atlanta and Toronto. He interviewed old schoolmates, neighbors, relatives, landladies, and many other people related to Ray's life and activities.

The results of this personal and intensive research are in the forthcoming Bantam book, now undergoing the round-the-clock publishing and distributing procedure to insure earliest possible availability of the book at news stands and bookstores throughout the country.

The "Strange Case of James Earl Ray" recreates the scene of the assassination in Memphis delves into the search for Dr. King's killer, the events that led to the identification of Ray, his background, the events leading up to his trial, and the events of early this week.

The complete transcript of the trial at which James Earl Ray pleaded guilty is included.

Small Wonder

The ability of our Saturn V system to reach the moon in 1969 with a man aboard depends on small electronic relays—some weighing only one tenth of an ounce. These jewel-like relays—similar to the gemstone on a ring (lower right)—are a recent development, and have the function of controlling the flow of electricity. The relays are made by the Aerospace Department of Westinghouse Air Brake Company, Pittsburgh, Pa., and are vital to many phases of our space program.

Some of the tiny electronic relays now used in the exploration of outer space are approaching weightlessness right here on Earth! One, for example, similar in appearance to the gemstone on a ring, weighs only one tenth of an ounce. Others will be even lighter.

The ability of our Saturn V system to put a man on the moon this year depends in part on such small electronic relays. A recent development, these jewel-like devices control the flow of electricity. The relays are made by the Aerospace Department of Westinghouse Air Brake Company (WABCO) and are vital to many phases of our space program.

"Since our first manned Mercury flight in 1961, spacecraft have been getting bigger—and electronic relays smaller," relates a company spokesman. "While many of the relays are the size of a pencil eraser now, our researchers are aiming even smaller—as our plans for future space flights grow larger."

In the past, these relays have helped Gemini space-walking astronauts guide

clearance system, in the instrument package controlling the guidance and control system and in the abort system.

When one of our astronauts took a space walk during a Gemini shot, few people knew that the control "gun" he carried was actuated by these tiny electric relays.

Mankind, it seems, is approaching the infinite and the infinitesimal at the same time.

Bill Cosby Gives His Version Of Noah's Ark in TV Special

NEW YORK—Comedian Bill Cosby relates his own version of Noah's Ark and re-creates some of childhood's most cherished and laughable moments, in "The Second Bill Cosby Special" to be colorcast on the NBC Television Network Wednesday, April 9 (9-10 p.m. NYT: preempting "Kraft Music Hall").

Like his first special, presented on NBC-TV March 18, 1968, this is virtually a one-man show spotlighting Cosby's talents as a stand-up comedian.

For openers, Cosby recalls his childhood and discusses amusing incidents involving his mother and father and the various advantages and disadvantages of having grandmothers, daughters, dogs and cats.

Spotlighted is a 20-minute monologue entitled "Russell," in which Cosby portrays three characters — himself as an 8-year-old, his 5-year-old brother Russell, and his father. Action centers in the Cosby home, where Bill shares bedroom and bed with Russell and spends much of the night fighting "billions of man-eating turtle heads" and assorted imaginary adversaries.

Cosby also talks of his childhood days in church, when "old weird Harold and I used

to put Scotch tape on our fingers backward when the collection plate came around," and Bill would successfully fake the words to little-understood hymns. Featured is a rendition of "Sinner, You're Gonna Be Sorry" by the Art Reynolds Singers.

Bill dons a long white beard and flowing robes to re-create his interpretation of the Biblical story of Noah and the ark, including a previously unreported conversation between Noah and the Lord. Noah's problems in building the ark ("What's a cubit?") and selecting animals of the proper gender are highlighted by a major production number entitled "Dance of Decadance."

In the finale, Cosby and the Art Reynolds Singers chorus "Lift Every Voice."

"The Second Bill Cosby Special" was produced by Campbell-Silver-Cosby Corp., in association with the NBC Television Network, with Roy Silver as executive producer, Silver and Bruce Campbell as co-producers, and Seymour Berns as director. The script was written by Frank Buxton, Ed Weinberger and Cosby.

Simmons Company (through Young & Rubicam Inc.) and Coca-Cola Company (through McCann-Erickson Inc.) each has half sponsorship of the special.

SHRINERS, DAUGHTERS OF 1515 ENTERTAIN RALEIGH KIDS — Members of Kabala Temple number 177, and Kabala Court of Raleigh, entertained fifty-four youngsters by taking them to the recent Ring-

ling Brothers, Barnum and Bailey Circus here. Back row, left to right are Nobles, M. C. Hill, Perry Crutchfield, James C. Johnson, past potentate; J. P. Greene, director of publicity; W. W. Laws, Silas Webb, Otis Autrey, member of the Waldrop Center's Board of Directors; Noble James Taylor, Lorenza Haywood, Center Director; and an unidentified employee of the Center. Second row from back are: Daughters Perry Crutchfield, Ida Brewer Lytel and Mrs. Charles Whitely. Each of the children expressed delight at being able

to attend the circus. Future plans of the Shriners and Daughters include Easter Egg Hunt, a train ride to Henderson, field trips, and a visit to the Raleigh-Durham Airport Noble John Ernest Jones is potentate of Kabala Temple.

French Movie Pick

PARIS — French moviegoers patronized German, Italian and Russian films more during the last quarter of 1968, but the Americans made out with a higher revenue despite lower attendance, a survey by the French National Cinematographic center reported.

UPI Strike Vote Asked

NEW YORK — United Press International and Wire Service Guild negotiators failed to reach agreement on a contract replacing one which expired at midnight Saturday. Talks recessed until Wednesday, and the guild called for a strike authorization vote from its members.

Wages were a principal point of disagreement when negotiators recessed early Sunday.

Runner Duster I, to thousands who flocked to the 1969 Chicago Auto show. The new sports car has many experimental features for improving stability in auto sports competition.

A person 65 years and older visits a physician an average of six times a year, while youngsters under 15 years of age have consultations with doctors less than four times annually.

New Opel GT Makes Debut

The latest in car imports is this new Opel GT, a sport, two-passenger mini-coupe, featuring spectacular performance and aerodynamic styling. The GT stands slightly over four feet tall, and is built at General Motors' Opel plant in West Germany. It is distributed in the United States by Buick-Opel dealers and will be available in limited numbers this spring.
