FILM-MAKING FUN

Every Dad Has His Day

Poor Dad—somehow it seems that out of the whole family he's the one who invariably ends up on the bottom of the gift list. He always seems to get either a shirt he'd be embarrassed to wear or something for the office which he'd just as soon forget about during his non-working hours.

This time why not treat Dad to a gift that makes him just as happy as it does everyone else. One great choice is an easy-to-operate movie camera. Not only does it make Dad practically an overnight pro but it creates a marvelous activity for the whole family to enjoy right along with him. There's good reason why home movie making has become one of the fastest growing hobbies in the country. The creative challenges it offers—and the genuine accomplishments quickly gained—makes it the perfect leisure-time recreation.

Because a movie camera represents somewhat of an investment it's important to choose carefully. Professional photographers and enthusiastic amateurs alike agree that no other camera offers the ease-of-operation and the photo-

graphic possibilities of the Bolex 155 Macrozoom. This revolutionary camera is the only one that can film from infinity down to one inch of the subject—creating a filming range designed to make Dad look good...and his movies look great! The beauty of this kind of filming is that it can be accomplished without any of the usual expensive attachments and time-consuming calculations. Whether filming at long distances, extreme wide angle or ultra, ultra close-up, focus is always perfect and accurate exposure automatic. To make the most of the extreme filming range of the Macrozoom lens, a Bolex patent, a device called a Multitrix is included with each camera. This is a copyholder used for titling, inserting explanatory printed material or for special effects never before thought possible.

So get Dad into the ideal gift-giving picture. This time give him a movie camera that's sure to make him the real star of every film he makes!
