Today's Scene At Hillside

By MICHELLE DEJARMON

Scour Power! Scour Power! Scour Power! This is the saying and the name that most of the Hornets have in their mind at this time. Monday, March 8, 1971 marked the start of two weeks of clean-up in our school. Many of the students have tried to keep their lockers clean while picking up paper off of the floor to help the cause. Some of the more brilliant students have even tackled the lunch-room problem. It seems as if the Hornets are taking pride in their school and for those that seem to have no home training, there have been a couple to take the initiative to tell them to take their trays up after they finish their lunch.

The Beautification Committee with Mr. T. M. Davis, advisor, has even made the task of cleaning up the school a task to look forward to. Some students have entered the contest. The contest deals with making posters to help remind the students that don't know any better that they don't live in a pig sty. There are prizes for the best looking posters. First prize is five dollars (\$5.00), second prize is three dollars (\$3.00) while third prize is two dollars (\$2.00). So all the Hornets that didn't make any posters, go in the main corridor of the building and look at the posters because you, the students of HHS will be the judges for the posters and you will decide which poster is most effective and who shall win the prizes.

The Beautification Committee is not the only committee that has something going at HHS. The Human Relations Council had a meeting on Friday, March 12, 1971. In the meeting Mr. J. H. Lucas principal of HHS presided. The people present were those that were on the Interim Committee and the teachers that signed up to work on the Human Relations Council. Mr. Lucas stressed the point that all people had to be represented in this Human Relations Council. This includes people of all religions, people of all races, Hippies, Yuppies and Flower children. He was careful not to leave out that if we had any Black Panthers in the school or if we had any junior members of the Klu Klux Klan they must be represented in the Human Relations Council. Mr. Lucas stressed that everyone was a member of the Council and that none of the students or teachers had to restrain their comments because they were a teacher or a student. Everyone was to be treated the same.

Mr. Lucas has designated the week of May 15, 1971 as Human Relations Week and everyone is to participate. The first two chairmen of the group are Miss Janie Elseiver and Mr. Lonnie Trollinger. These are not the only chairmen of the group. Instead of having one or two chairmen we will have rotating chairmen. The reason for this is that everyone has different values and this will give everyone a chance to express the views and get a look at many other and different views. The meeting lasted a little over an hour but was very meaningful. There were some questions that were asked and they were meant to make people think. They were as follows: Is there really a difference between Black and white middle class? Black, white, red, and yellow children are entrusted to me as a school principal, how should I treat each of them. If you were on a boat with black, white, red, and yellow children and one of them had to jump off to save the life of the rest which would you tell to jump? Would the world be a better place if you had anyone but the Caucasian race running things for a while or would it be better if everyone black,

white, red, and yellow all were running this society? Does prejudice really begin with me? These were some of the most important questions that were asked. How would you answer these questions?

The Human Relations Council is very important and there is a new Society that is trying to get started at Hillside. It is the Afro-American Society. The purpose of this society is to provide an organization in which students along with the guidance of our advisors can compose, organize, direct and control "channels"

MISS DEJARMON

through which we can make "Education more vital" and relevant to the development of ourselves. This in itself will help many of the students but it will also open new channels for group discussions, and speakers forum. An Afro-American Library, and an Afro-American room will be needed. Along with this, Afro-Seminars with students will be held at fourth and fifth (4th and 5th) lunch periods and it is entirely voluntary. No one is being made to attend these educational classes! Some committees in the society are The Organizational Committee, Speakers Forum Committee, Rap Committee, Afro-American Library Committee, Seminar Committee and Funds Committee. Of all the committees listed above, the most important committee is the Afro-American Library Committee. The committee is to be responsible for establishing means in which we can get books and materials necessary for our library. This is important because everyone needs to read all history but the most important history one needs to read is the history about him or herself. The advisors for this group are: Mrs. M. G. Cousin, Mrs. J. H. Lucas and Mrs. V. S. Willis. For all of the Hornets that are interested please go by and see one of these advisors and let them fill you in on what you don't understand about the Afro-American Society.

To Ronald Scarborough, we were happy to see you in school to day, (3-15-71). Although you won't be able to come back to school for another couple of weeks, we were happy to see you anyway.

Good luck to all the seniors, and most of all, we the students, wish to Big Bird and Baby Ray good luck and hope they can get together although they are not seniors. Love to Jerome, Ruben, Scobbie, John, Donnie, Norwood, and Butch. Greetings to Gina and Bernell. To all of the twins at HHS and my six special twins at DHS remember to say to your main thing "I gave to you," but what did you do to me. Happy Birthday Bill!!!!

Bye Now.

PREGNANCY PLANNING AND HEALTH

by Mrs. Gloria Riggsbee

Dear Mrs. Riggsbee:

I would like to know if there is any danger in having intercourse during your period? Also, I would like to know how long you may continue to have intercourse after you become pregnant. And please send your booklet on birth control methods to me. Thank you.

Mrs. S.

Dear Mrs. Slaughter:

I am sending you a copy of the free booklet on birth control methods, called "The Right Way to Birth Control." There is no danger in having intercourse during your period. If you have an IUD such as the loop or if you are taking birth control pills, there is also no danger of getting pregnant. As long as a woman takes the pills as directed, she is protected even during the time of her period.

If you are using other forms of birth control, you should continue to use it even during your period, since there is a slight chance that you could become pregnant during that time.

There really is no set rule about when a woman should stop having intercourse while pregnant. Each woman should be guided by her doctor's advice, and if he doesn't mention it, she should ask him. Most doctors feel that intercourse should stop about six weeks before the baby is due. Others place no limits on this, but say the woman should let her own desire (and comfort) be the judge. In cases where the health of the mother or baby might be threatened, the doctor will always tell the patient when she should stop having intercourse.

Dear Gloria:

I would like to know if it is possible for a woman who has less than four children to have her tubes tied. My husband and I absolutely don't want any more children than the two we already have. I take the pill, but I don't want to have to take it from now until I am through with the change of life. Could I possibly have my tubes tied?

Highlights At Durham HI

By MONIKA L. GUNN

Gunnie here, reporting to you the latest happenings from Durham High. Tuesday, Peter Marshall came to speak to the student body on the topic of Christianity. His father was a former minister of the United States Senate, and his mother, a well-known authoress. He encouraged us to make an effort to see the movie, "The Cross and the Switchblade." It tells how a young minister struggles to understand and convert such hoodlums as Niki Cruz. Marshall stated that most people formed the belief that Christianity is a "white man's" religion. He assured us this was not true, that God is for all!

The East Carolina Percussion Ensemble treated the D.H.S. "Bulldogs" to a pretty cool concert Wednesday. We really appreciated their coming over to play for us.

Student Council President Jeff Kristeller called a Representative Council meeting Friday. The Constitution Committee gave an up-to-date report of their revising the school constitution. Plans are now being made for the Spring Folly, (this is a type of talent

show). If there are any interested persons, please contact me or Patti Poe. Ralph Barrette is in the process of getting things together for the painting of the cafeteria. He is looking for some good designs to use, so if you have any ideas in this area, let us know. Please support the Junior's candy sale, so that the Jovial Juniors and the Silly Seniors will be able to have a "supercool" prom. The date has been set for May 1st.

From Gunnie's Dusty Files - Poor Reuben Hayes really had some explaining to do when Michelle caught him in the arms of another girl. Shame on you Reuben! Happy Birthday to Bill Arney, who is one older and -----? Special message to Tom: If you and the boys don't have anything better to do than to push a car down Fayetteville Street, how about a game of bingo down at the Salvation Army House? Earline, is it really love this time? Well, as Holloway says, 'I guess I'd better 'clarence' on.' Next week, Audrey will report to you the Highlights at Durham High.

There is no law in North Carolina which requires a woman to have had four children before she can get her tubes tied.

If you want to have this done, however, you should understand that, unless it is a medical necessity, doctors do reserve the right to decide whether or not they will do this type of operation. Doctors want to feel that a couple who requests sterilization is mature and fully aware that sterilization (tubal ligation or vasectomy) is permanent. Physicians feel it is their obligation to make this judgement. Sterilization is a very serious step and the doctor who will do this wants to be assured that the couple has fully thought it out beforehand.

You and your husband should plan to see a doctor together. When you talk to one who will consider tying your tubes, he may want to ask you both some questions such as: what either of you think you would do in the event of the death of your spouse and a remarriage; or in the case of divorce and remarriage to someone who might want children. If the doctor agrees to the surgery, he will ask you both to sign a consent form and wait thirty days before the operation is done, to be sure you don't want to change your minds.

I am enclosing a fact sheet on a new method of sealing off a woman's tubes which is now being done in at least one hospital in the state. For women with no medical complications, this procedure, called laparoscopy, is much simpler and less expensive than the standard method of tubal ligation.

perhaps you and your husband might want to consider a third method of sterilization - vasectomy for the man. Vasectomies are the simplest and cheapest method of permanent birth control (sterilization) that is available. A vasectomy does not interfere in any way with a man's enjoyment of sex.

If you would like a booklet which complains about vasectomy and tubal ligation, please write me for a free copy.
