Questions on Your Family's Move...

answered by **Alice Bowman** Home Moving Consultant Allied Van Lines, Inc.

Dear Miss Bowman: We're about to make our first move and I'm worried about fitting into our new community. Any hints? I'm not the "pushy" type. Mrs. E. C. Elmwood Park, Ill.

ANSWER: Yours is a common worry. Let me share along the comments of a California woman I talked to recently. She has made 15 long-distance moves in the last 12 years and told me: "The new woman in town has to make the first contacts. She needs the community more than the community needs her. She just can't sit home and wait for the doorbell to ring. It won't. Church groups and school organizations have provided her with many new friends in various communities. And she added: "Don't have false modesty. If you can do something, volunteer to do it. Everyone loves a volunteer."

Dear Miss Bowman: Is there some "best" way to organize our new home after arrival? Mrs. D. Y. St. Louis, Mo.

ANSWER: Good for you! Pre-planning is everything. I'd suggest getting the children's rooms ready first, to reassure them and eliminate any strangeness they might feel. Then, your room... there's nothing like a good night's sleep after that moving-in day. And next, the kitchen, at least as much as necessary to provide hearty meals and adequate table settings for the first few days.

CYCLING SURPRISES

IT'S HISTORICAL! In 1965, a Japanese bicycle rider set a new world record for slow cycling. He did it by remaining motionless on his two-wheeler for almost 5 1/2 hours.

IT'S POPULAR! Motorcycling has become so popular in America that just about anyone can find a "bike" seemingly tailor-made to his needs. And that's because the total number of models to choose from numbers well into the hundreds.

IT'S NEW! Kawasaki has introduced the first really successful combination sport/touring motorcycle in the U.S. It's called the Z-1 and is powered by the industry's only 903 cc transverse four cylinder, four stroke, dual overhead cam engine. Built by the same company which developed Japan's famed Bullet Train and a variety of aircraft, the Z-1 is engineered for reliability and performance.

IT'S SAFE! Attending to the safety of modern mini-bikes, the Y.M.C.A. in Los Angeles rewards previously incorrigible children who attend school and obey rules with mini-bike riding in supervised events.

BBQ SAFETY HINTS

Danger lurks in even the most peaceful surroundings and many backyard cookouts have ended in tragedy because the chef ignored common-sense safety rules.

Place your barbecue grill out in the open, away from anything flammable. Make certain it has sound footing and is away from primary activity areas but is set up to allow room to work. Safe grill equipment is important so are your forks, tongs and spatulas have long handles. Use heavy glove-style pot holders and dress in a non-flammable apron. Avoid loose clothing that might catch fire.

Keep children and pets away from the grill, and never remove the grate until it is cool. Don't dump out coals until they are completely extinguished, and don't leave them without adult supervision after the barbecue is finished.

If a sudden change in weather occurs, move your cookout to a protected area, but never barbecue in a garage or other enclosed space unless it is ventilated adequately, because glowing coals will produce deadly concentrations of carbon monoxide.

Perhaps the most dangerous aspect of barbecuing is igniting the coals. Avoid using gasoline or other explosive fuels. The best starter is one that is dry, non-explosive and non-poisonous, such as a new product called Fire-Stix, which is available wherever you buy barbecue equipment. The product won't flare up, throw off sparks or leave an aftertaste. Four small pieces of the starter are placed on top of the coals, and lighted with the touch of a match. The coals will be ready for cooking in about 25 minutes. For the address of your local dealer, write Fire-Stix, P.O. Box 2841, San Rafael, CA 94902.
