PHILIP MORRIS' NEW \$6 MILLION RESEARCH CENTER TOWER IN RICHMOND

Philip Morris' \$6 million which was dedicated on April 26, joins six other buildings in the company's Research Center. Designed by the noted American architect, Ulrich Franzen, the Tower provides nearly 100,000 additional square feet of space to the Research Center and provides a key unifying link for a wholly integrated research and development program in the years ahead. Joseph F. Cullman, 3rd, chairman of the board of Philip Morris, Inc., observed, "the Research Center Tower symbolizes our continuing scientific research efforts, and also the start of a new phase of intensive explorations aimed at providing consumers with the best products possible".

Here's one time you should rush out and buy the tires you need!

HERCULES Premium Tire Sale STEELPREME

More than a mile and a quarter of brass-coated steel filament is stranded into cables, then woven into belts and embedded deep in the body of the Hercules Steelpreme tire. These belts keep the tread firmly on the road, rolling straight and true. Because there's less tread movement, less squirming and scuffing, it's one of the longest mileage passenger tires Hercules has ever made. And steel belts do things for car handling which will surprise you! At low speeds you won't notice much difference, but at high speeds they handle the way you always thought the best tires should! Polyester plies add easy riding to steel's toughness. This tire can live through shocks which used to kill ordinary tires. Think you can't afford such luxury? Come in and get the surprise of your life!

Something Better in a Tire... and a Man Who Stands Behind It!

RIGSBEE TIRE SALES
