Two Young Democrats May Win London Trip

Two young Democrats from Orange County may be on their way to London, England this summer with a little luck and hard work, says Mae McLendon, president of the Orange County Young Democrats.

The Young Democrats of North Carolina are sponsoring a membership drive, explains Ms. McLendon and the county or college club that earns the most points in the membership drive gets a round trip

ticket for two to London, to be given to whomever the local club members considers the most deserving.

Deadline for the contest is April 29.

The Young Democrats is an organization of registered voters age 35 or under who are interested in politics and learning about the political process. Ms. McLendon explains. Voters age 36 or over are welcome as honorary members and are counted in the membership drive.

The contest winner will be decided on a weighted point system, says David Swanson, chairman of the state Young Democrats membership drive. The trip is being donated to the state organization by National Travel Group, a travel agency in Raleigh. Membership dues are \$5.

CORRECTION

In last week's report entitled "Durham Homemakers Attend Seminar", Mrs. Susie Walker should have been named as president of the Pearisonton Homemakers group. Mrs. Lenora Hooker is Chairman. Our apologies to both ladies and the group.

THIRTY YEAR STUDY SHOWS EMOTIONS CAN CAUSE CANCER:

A recent report on a 30 year study at the Johns Hopkins Hospital in Baltimore has confirmed what medical authorities have been saying for centuries: human emotions can be a factor in the development of cancer.

This means that loneliness and estrangement from family may one day be listed with cigarette smoking and environmental chemicals as causes of cancer.

A task force of the American Psychological Association reported last year that cancer often occurs in persons who repress unpleasant childhood experiences. It based its conclusion on an accumulation of studies in recent decades like the one done at Johns Hopkins.

One of the most recent studies of cancer was done by the late Dr. David Kissen at the University of Glasgow in Scotland. It involved 150 lung cancer patients. Dr. Kissen found that most of the patients had experienced loss of a loved one before developing cancer.

The researchers at Johns Hopkins, headed by Dr. Caroline Bedell Thomas, interviewed and tested entering medical students between 1948 and 1964 in what is described as one of the most extensive studies of psychosomatic disease ever undertaken.

The researchers have followed 1,337 medical students through their careers as students and doctors, and those surviving now range in age from 30 to 60.

In the Hopkins study, 41 of the doctors have died, and 131 have fallen ill, including 16 listed in the

EBONETTES HELD ONE DAY WORKSHOP - The candidates for the 1977 Debutante Ball participated recently in a one day workshop on the campus of North Carolina Central University. The events of the day included a grooming and personal care clinic conducted by consultants from DeShazor's Beauty College. The consultants actually aided the debbs in preparation for their formal pictures which were taken immediately following the grooming clinic. The eleven debbs present and members of the Ebonette Club lunched at Picadilly Cafeteria in South Square Mall. The afternoon was devoted to a session with Mrs. Nancy Pinckney in which the debbs and their escorts rehearsed the waltz to be performed the night of the ball. The next activity scheduled is the final rehearsal and party to be held April 15th, the night before the Debutante Ball.

Perfect freedom is as necessary to the health and vigor of commerce as it is to the health and vigor of citizenship.
