

**A PENNY SAVED IS A PENNY EARNED** ... AND YOU'LL FIND THOSE SAVINGS REALLY ADD UP WHEN YOU SHOP AT **The Carolina Times ADVERTISERS**

**Award Recipients**  
Some of the U.S. Labor Department employees honored for personal achievement or for helping advance job opportunities for women are shown with Velma M. Strode, director, Office of Equal Employment Opportunity, far left, and Ruth Britt, manager, Federal Women's Program, far right. Award recipients are, seated, from left: Shelia Warner, Leta B. Wilson, Dorothy Come, Margaret Washington, Cassandra Isom, Doris Wilkins, "Caridad Dominguez, standing from left: Doris Wooten, Thelma Smith, Bettyjane Coker, Dawn Schraegle, Carl Whisenton, Elsie Stephens, Frances Ashton, Allean Allen, Bonnie Friedman and Ann Marie Mack. The awards were presented at the opening ceremony of the department's sixth annual observance of Federal Women's Week in Washington, D.C.

**CHARMING GRAD GETS HIGHEST AWARD AT NCSU SCHOOL OF ENGINEERING**

By Mary Yionoulis  
Efficiently and energetically, with expressive dark eyes and a contagious, broad smile, attractive Miss Sharon Smalls of Winston-Salem has gone about the last four years getting an education in mechanical engineering at North Carolina State University. Her enthusiasm for study and hard work has netted her a high scholastic record and one of the highest student awards presented by the NCSU School of Engineering. Second in her senior class in the Department of Mechanical Engineering and Aerospace Engineering, she holds a 3.93 grade

DEAN MONTEITH

MISS SMALL

point average out of a possible 4.0. Her record of academic excellence and her achievements in extracurricular activities brought her recognition this spring in her designation for a Dean's Leadership Award. Daughter of Mr. and Mrs. William Smalls of 441 Bacon Street in Winston-Salem, the outstanding student will graduate May 12 with high honors. She has accepted a position with IBM in Charlotte. She reports to work in July, following her marriage June 2 to Jimmy Exum of Goldsboro, a civil engineer with Duke Power Company. He received both his B.S. and masters degrees in civil engineering from N.C. State. In a recent interview, Sharon expressed her enthusiasm for N.S. State and the "excellent opportunities it has given me to mature in all aspects of life." "I have been very comfortable and have never felt out of place on campus or in my classes," she said. She credits her father and her guidance counselor for directing her to engineering as a possible career, since she liked mathematics and the sciences. She is a 1975 graduate of R.J. Reynolds High School. "I like applying engineering theory to solving a mechanical problem," said the scholar who made an "A" in thermodynamics. The admiration her fellow students hold for her leadership and her engineering know-how was expressed recently when she was chosen a group leader for a mechanical engineering senior project. She led a group of six other mechanical engineering students to the design and development of a water-powered trash compactor. The slim, energetic Sharon who displays much stamina in the demanding projects she undertakes has been described by her professors as "an eager and willing leader and participant. She served this year as secretary of the student section of the American Society of Mechanical Engineers, chairperson of the Engineers' Council Outstanding Teacher Selection Committee, treasurer of the Alpha Kappa Alpha Sorority and treasurer of the Society of Black Engineers. She has also served on numerous committees and held many offices throughout her four college years, including representative to the Engineers' Council, the engineering school student government group. She had held several scholarships and has participated in the North Carolina Fellows Program designed to develop leadership potential. Honorary groups to which she belongs include Pi Tau Sigma, mechanical engineering honor society, Tau Beta Pi, national engineering scholastic society, and the order of St. Patrick, leadership society. She was selected the Outstanding Junior in Mechanical Engineering last year. Sharon, who plans to go on to graduate school in the future for her advanced degrees, highly recommends engineering as a profession for women. "Although my 12-year old sister, Tonya, who is in the eighth grade hasn't expressed any definite career plans yet, I hope she will consider engineering," she said with her broad smile that lights up her face with enthusiasm. Her father is employed by the R.J. Reynolds Tobacco Company and her mother is personnel manager at Winston-Salem State University.

**So Nice On The Slice.**

MIRACLE WHIP Salad Dressing from Kraft is an old favorite in salads and dressings. But its secret blend of herbs and spices adds a fresh, lively, one-of-a-kind flavor to your favorite breads, too. For special taste treats, put something really nice on the slice. Miracle Whip — "The Bread Spread."

**SARDINE SUPREME SANDWICH**  
2 3/4 oz. cans sardines, drained, flaked  
MIRACLE WHIP Salad Dressing  
Dash of Tabasco  
1/2 teaspoon pepper  
Lettuce  
4 hard rolls, split  
Combine sardines, 1/2 cup Miracle Whip and seasoning, mix well. For each sandwich, spread roll with salad dressing. Cover with lettuce, sardine mixture and garnish with additional sardines and onions, if desired. Serve with top half of roll.  
4 sandwiches.

**KRAFT** ...means more than cooking.

**Bureau Seeks Information On Dual Jobholding**

How many American workers are holding more than one job? How many are working overtime and what is their overtime pay? What are workers' usual hours on their jobs? Joseph R. Norwood, Director of the Census Bureau's Regional Office in Charlotte, announced today that information in response to these questions will be collected during the week of May 14-18, for a sample of households in this area. The questions are in addition to those usually asked in the monthly survey on employment and unemployment conducted nationwide by the Bureau for the U.S. Department of Labor. Households in this area are part of the sample of 76,000 across the country scientifically selected to represent a cross section of all U.S. households. Results of this monthly survey provide a continuing measure of economic conditions in the Nation. The March survey indicated that of the 102.7 million men and women in the civilian labor force, 96.8 million were employed. The Nation's unemployment rate was 5.7 per cent; it has been in the 5.7 to 5.9 per cent range for the past eight months. Information supplied by individuals participating in the survey is kept strictly confidential by law and results are used only to compile statistical totals. Interviewers who will visit households in this area include: Mrs. Mary W. Gary and Mrs. May E. Kirchman.
