

How to get the most from your bank

Members of the Senior Choir of Red Mountain Baptist Church, Rougemont, were honored for their birthdays by Mrs. Symner Daye at her home last Tuesday evening with a buffet dinner following rehearsal.

Those honored were: Mr. and Mrs. Jethro Rogers, Mrs. Virginia Kenion, Mrs. Margaret J. Parker, Mrs. Jessie Turrentine, Mrs. Elizabeth Bullock, Mrs. Neomia Mae Laws, Maceo Bullock, Mrs. Daisy Parker, Ms. Vivian Parker, Mrs. Emma P. Mason, Mr. and Mrs. David C. Parker, Mr. and Mrs. Oliver Bullock, Mrs. Burl Riley, Mrs. Carrie Parker, Mrs. Cora Mae Allen, Mrs. Nola Folks, Mrs. Juliann Harris, Mrs. Vera Parrish and Mrs. Catherine Parker.

 Congratulations to Mr. and Mrs. Gregory Hedgepeth of Washington, D.C., on the birth of a son. Grandparents of Mr. and Mrs. E.J. Hedgepeth; Mrs. Margaret J. Parker is great grandmother.

 Dexter Parker and his fiancée, Miss Cynthia Miller of Greenville, students at East Carolina University, recently visited his grandmother, Mrs. Margaret J. Parker in Bahama.

 Congratulations to Mr. and Mrs. Rodney Harrison on the birth of a daughter. He is the son of Mrs. Alease Slowe of Maryland and grandson of Mr. and Mrs. W.A. Harris of Rougemont.

 Happy birthday anniversary to: Ms. Jean Bryant, Ms. Cynthia Walker, Mrs. Mattie Cameron, Cleo Green, Kelvin Hayes.

 Mr. and Mrs. Hubert Dunnegan are celebrating their 54th wedding anniversary. Mr. and Mrs. William Smith are also observing their wedding anniversary.

 The 4-H Clubs of Russell and Rougemont had an all-day fish fry Saturday, April 24, at the Russell Community Center on St. Mary's Road.

 Miss Regina Parker of Bahama has returned home after having spent a week with her sisters, Misses Cheryl and Acquilla Parker in Greensboro.

 James Turrentine of Norfolk, Va., has returned home after having spent a weekend with his mother, Mrs. Jessie Turrentine in Durham.

 Congratulations and best wishes to newlyweds, Mr. and Mrs. James Marrow and Mr. and Mrs. Earl L. Smith.

 Mr. and Mrs. Ricardo Privette of Fayetteville spent the recent holidays with her parents, Mr. and Mrs. Darryl Daniels in Durham.

 Carl Harris and a friend, David Carter, spent the weekend with his parents, Mr. and Mrs. James Harris in Rougemont. Carl is now attending Appalachian State University in Boone. David is also a student at Appalachian and is a native of Barbados in the West Indies.

 Please pray for the sick and shut-ins. Do something to make them happy. Mesdames Pearl Foskey, Hattie Parrish, Anna Myers, Annie L. Wade, Constance P. Thomas, Georgia Lyons, Georgianna Ray, Bettie A. Clay, Kate Lowe, Dorothy T. Lawson;

 Messrs. W.A. Harris, Ervin Lyons, Larry Turrentine, Earnest Mangum, Sr., Joseph Wade, Jural Johnson, Hosea Moore, Archie Hawley and John Lyons.

 Sincere sympathy is extended to the families of: Mrs. Nine H. Middleton, Mrs. Hattie Carmeneal, Mrs. Effie F. Young, Mrs. Edith Middleton, Douglas Robert, Mrs. Roxana Revelle, Ira Toeran, Mrs. Bessie S. Jones, Arthur Jacob Clement, Mrs. Odessa Littlejohn, Allen D. Hinton, H. Arthur Lyons, Dr. David B. Cooke, Jr., and Henry Moore.

The Bulls Should Play More Sunday Games

By Elson Armstrong, Jr.
 It's hard to criticize the operation of the Durham Bulls over the past couple of years since they returned and filled a summer sports vacuum in central North Carolina.

The Durham Athletic Park is a great place for baseball, the team is exciting, and the park workers from the front office to the usherettes give a 100 per cent effort to make the paying public enjoy their baseball outings.

The only thing that Durham has failed to do on a regular basis is play Sunday afternoon games.

In 1980, I favored the Sunday night only concept, but now after talking to fans, media, people, and Bulls Manager Bobby Dews, I say that it's time that the Bulls play at least half of their Sunday games in the afternoon. I think the fans would definitely go for it. Sunday afternoon games are as American as apple pie.

It is true that many minor league teams

Classic

(Continued from Page 5)

New Orleans. He has been the head coach at UNC for 21 years.

Valvano has been at North Carolina State for two seasons. He led the Wolfpack to the NCAA's this past year and is well known for his color and charisma.

Knight, Smith and Valvano will play golf while Krzyzewski will compete in the tennis tournament.

Former President and Mrs. Gerald Ford and Philadelphia Eagles' quarterback Ron Jaworski have previously announced that they will attend the Classic.

CREDO OF THE BLACK PRESS

The Black Press believes that America can best lead the world away from racial and national antagonisms when it accords to every person, regardless of race, color or creed, full human and legal rights. Hating no person, fearing no person, the Black Press strives to help every person in the firm belief that all are hurt as long as anyone is held back.

don't draw well on Sunday, but as has been proved time and again, Durham is not just any minor league city. This town loves the Bulls and it is my opinion that Sunday games would do well.

The Bulls now play on Sunday afternoons only when there is a live local telecast and even then more than 2500 people came to the game. Durham's normal July

and August heat waves, might make an afternoon game unbearable. But April, May and even June afternoons would seem almost perfect to spend a few hours screaming, "Let's Go Bulls" under the afternoon sun.

I'd like some feedback from you Bulls' fans. Would you like to see more Sunday afternoon games at the Durham Athletic Park?

A CROWD OF MEMBERS and supporters turned out Sunday to help the Durham Baha'i Assembly celebrate its 20th anniversary.

HOW TO KEEP DUKE POWER FROM BUILDING SO MANY PLANTS.

A lot of people think we should stop building power plants. And we don't blame them. Because every time we build one, the rates go up.

We're not happy about building power plants either. But the truth of the matter is, we have to. It's our job to provide the electricity our customers need, when they need it. And the demand for electricity keeps increasing all the time, thanks to population growth, industrial expansion to provide needed jobs, and an increased standard of living. A standard of living that includes color television sets, washers, dryers, disposals, you name it; chances are it's done with electricity.

So as long as those needs exist and continue to grow, there'll always be a need for more power plants.

SLOWING THE GROWTH

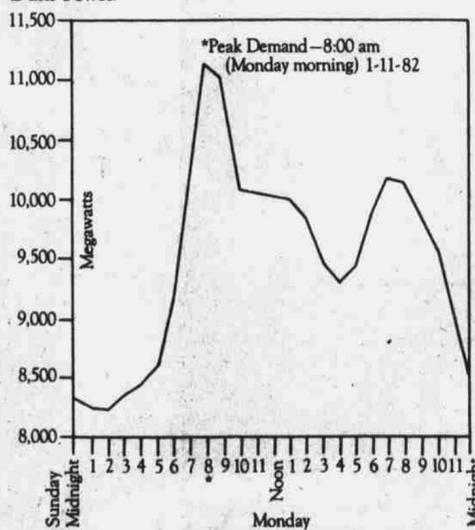

We can't stop new power plant construction, but we can slow it down. And in doing so keep your rates from rising so fast. In fact, we can save more than \$10 billion in construction costs by the year 1990. And a whole lot more money in decades to come.

It all has to do with something called Peak Demand and Load Management.

UNDERSTANDING PEAK DEMAND

Customer demand for electricity isn't the same all the time. It has peaks and valleys. The highest demand for electricity—the peak—usually occurs on either the hottest or coldest weekday of the year. In addition to all the normal uses of electricity in homes, businesses and industries, that's when heating or air-conditioning systems—the biggest electric users of all—are running full blast.

The following graph shows what happened on January 11 of this year when you and other customers used the most electricity in the 78-year history of Duke Power.

Duke Power has to have enough generating capacity to meet peak demand. Even if it only occurs for a few moments. But because that peak demand keeps growing, we have to build more power plants.

But if we could control that peak, it wouldn't go up so fast. We wouldn't have to build so many plants. And you wouldn't have to pay for so many. That's what Load Management is all about.

UNDERSTANDING LOAD MANAGEMENT

Load Management is designed to keep the peak demand from growing so fast. And Load Management

can be accomplished through a series of plans we've been working on for years.

A lot of these plans deal with using electricity more efficiently in factories and businesses. And a lot of them can be implemented right in your own home.

These can:

RC Electric Rate. Our lowest rate for residential service. It was designed to reward those customers whose homes meet stringent energy efficiency requirements.

Energy Efficient Structures. A plan for new home construction that specifies the amount of insulation and other thermal control features to minimize heating and air-conditioning costs. If a home is certified by Duke Power as an Energy Efficient Structure, it not only saves energy, but also qualifies for the RC rate.

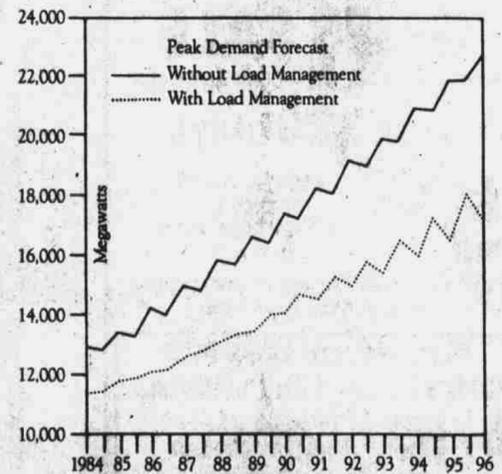

Energy Efficient Appliances. A plan that helps you identify the most energy efficient appliances available today, including a list of dealers who sell these products. The plan also offers you tips on how to operate these appliances more efficiently to save even more money.

Time of Day Rates. A plan that charges you a special low rate for the electricity you use during periods of the day when the overall demand for electricity is low. (Available only in limited areas at this time, but coming to your neighborhood in the future.)

Load Control. We'll pay customers up to \$50 or more a year for the privilege of installing remote control off-on devices on electric water heaters and central air-conditioning systems. These devices will enable us to interrupt service to either or both of these appliances during emergency situations. And in most cases, the interruption will go unnoticed by the customer. Once the crisis has passed, power will automatically be restored. (Available only in limited areas at this time, but coming to your neighborhood in the future.)

Load Management can play an important role in holding down your future electric bills.

But in order for it to work to the benefit of all of us, we're going to need the cooperation and participation of thousands of Duke Power customers.

Power plant construction costs are rising rapidly. And the fewer we have to build, the less you'll have to pay for electricity in the years ahead.
