Casual Elegance: (left) the perfect accessory for day—the luxurious look of silky hair! A variation for evening excitement (right): a cascade of curls tamed with side combs. Lots of volume and soft texture...thanks to Gentle-Treatment.

**Tips For A "Head" Start On Healthy Hair**

Head off problems before they occur! Give your hair Gentle-Treatment. "Too many of us have become victims of the 'age of convenience,'" says Angela de Joseph, Beauty Director at Johnson Products—a leader in black hair care and beauty products. "We are forever on the go, tending to rely on heated appliances to give our hair the look we want in the shortest time possible. But, constant use of blow dryers, heated rollers, and curling irons tends to dry out the hair and damage the ends, Ms. de Joseph notes. "Black hair, because it grows up and away from the scalp in a spiral pattern has a tendency towards dryness—a condition aggravated by the repeated use of heated appliances and styling aids." "What we need is to take a little time out of our busy schedules to give our hair some special pampering. A beauty regimen that includes frequent trims and conditioning treatments is essential to the health of our hair," adds Ms. de Joseph. "The concept of a nolye conditioning relaxer for black hair is the reason Johnson Products developed its new creme conditioning relaxer and called it Gentle-Treatment," notes Ms. de Joseph. This is the only relaxer on the market with a patented conditioning system built right into the relaxer itself. Gentle-Treatment leaves hair so soft and silky, you can run a comb easily.
