**Ever Salivated by Calomel?  
Horrible!**

Calomel is quicksilver and acts like dynamite on your liver.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel just remember that your druggist sells for 50 cents a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and can not salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.

**Died off at College.**

He was twenty-five years old and had been a student of the Agricultural and Mechanical College, Greensboro, nearly five years and from which institution he would have graduated at the close of the spring term. He was a quiet and well behaved young man and deserved much credit for his effort to complete his education.

His parents have the sympathy of the entire community in their bereavement.

We have a copy of the resolutions passed by the senior class, teachers and students of his college that will be published in our next issue.
