What Does Trustee Mean?

The Legislature is a body to make laws for the people; not to make laws to suit people but laws to help the people and lead them in the right way, that in the end they may be blessed and benefitted.

The trustees are a body of people selected by the public in whose judgement and integrity they place the welfare of their children.

A trustee is like a guardian. A teacher might be called a foster mother, and both should be interested in the student in every way, physically, mentally, and spiritually. This means that they should stand for what is right; to possess a strong and mighty backbone that will not bend or break; to consider no standard to high; to erase all tendency toward evil; to consider no method too good for little human souls wherever they be; to not be governed by the whims of patrons or the whines of children, but to hold fast to what is right and best.

Will you give your children fire just because they say it is pretty, when in the end it will mean destruction? To be educated means preparation for usefulness; it is a weapon for lifes warfare.

Look at the frivolity of the nation, then do you wonder why there is war? Was it not sent to school us and educate our hearts. The time has come when parents obey their children and others are expected to do likewise.

Trustees move in a classical way.

A school teacher.

(Continued on page 4.)

It is supposed that Charles N. Watson, who enlisted in the U. S. A. in April, is on his way to France. A message from him dated June 10 stated that they were leaving on transports that morning. Not a word has been heard from him since.

Mrs. Davis and children, of Pen-
sylvania, are visiting Mrs. R. H. Taylor.

Miss Mary Norwood of Goldsboro, who has been the guest of Miss Lillian Shaw for the past week, left Tuesday for Windsor to visit Miss Janie Lyon.

Mr. Roy Britton and family of Colerain, are visiting Mrs. W. P. Shaw, Jr.

Miss Helen Turner has returned from a visit to Suffolk.

Mr. and Mrs. R. W. Story, of Courtland, Va., spent the week end with Mr. and Mrs. R. E. Storey.

WINTON WAVELETT'S

The Revival Services began in the Chowan Church Friday evening, June 22, are well attended. Rev. Fred N. Day, who is well known in this section, is a most earnest preacher. The congrega-
tions are enjoying the singing, led by Mr. H. B. Eason, for he knows just how to manage a choir. The people who attend the services will be benefitted by the preaching and singing. Quite a crowd came over from the nearby towns Sunday night. All who come are assured a welcome from the members of Chowan Church. The services will continue through Sunday, July 1st.

The Camp Supper given by the Y. W. A. of Chowan Church Tuesday evening at Tunis, in honor of the soldier boys, was a most enjoy-
able affair to all parties. Each girl invited a friend. The party left Winton in automobiles at five o'clock. After an hour spent informally but most pleasantly the crowd was invited to partake of a most tempting supper, served in picnic style near the tents. The time to return home came all too soon but the girls came home with happy hearts, knowing that they had given to the soldier boys, who are far from home and doubtless will soon be farther away from loved ones, a most pleasant evening. It is reported that the boys will leave Tunis Tuesday for, they know not where, perhaps to France.

Miss Louise Vann and her assistants have been untiring in their efforts soliciting funds for the work of the Red Cross the past week. We are sorry to say that Winton has not responded to this noble work in as liberal way as she should. If your own boy is sent to France you ought to be glad to aid in this work if you have been spared this sacrifice you should be glad to help somebody else's boy.

Miss Lillian Shaw entertained a number of girl friends Wednesday afternoon in honor of her guest, Miss Mary Norwood, of Goldsboro.

Mrs. M. R. Herring entertained with a Rook Party Thursday evening in honor of Miss Mary Norwood. Six tables were arranged for the game. At the close of the evening refreshments were served.

The Chowan Club met with Mrs. S. N. Watson Monday evening. After the business of the Club had been transacted, the program on Social Service especially in our own State, was given. The readings and papers were all good, but the papers on Prison Reform by Mrs. J. W. Boone, and Heeding the Cry of the Needy Children by Miss Georgia Pil-
land, deserve special mention. The program was helpful and instructive. The next meeting will be with Mrs. J. W. Boone.

Miss Emily Clark is spending this week in Norfolk.

It is supposed that Charles N. Watson, who enlisted in the U. S. A. in April, is on his way to France. A message from him dated June 10 stated that they were leaving on transports that morning. Not a word has been heard from him since.

Mrs. Davis and children, of Pen-
sylvania, are visiting Mrs. R. H. Taylor.

Miss Mary Norwood of Goldsboro, who has been the guest of Miss Lillian Shaw for the past week, left Tuesday for Windsor to visit Miss Janie Lyon.

Mr. Roy Britton and family of Colerain, are visiting Mrs. W. P. Shaw, Jr.

Miss Helen Turner has returned from a visit to Suffolk.

Mr. and Mrs. R. W. Story, of Courtland, Va., spent the week end with Mr. and Mrs. R. E. Storey.

Mr. E. L. Jenkins was carried to Lakeview Hospital Saturday afternoon and operated on for, appendicitis. A message from the hospital Monday stated that Mr. Jenkins was improving nicely.

WHEAT GROWING IN EASTERN CAROLINA

West Raleigh, N. C., June 26—Recently there have come a number of inquiries to the North Carolina Experiment Station from different parts of the Coastal Plain section of the State asking as to the advisability of sowing wheat in this portion of the State during the coming fall. Ordinarily, with the price of wheat ranging around normal, it is not thought advisable to grow wheat on these sandy soils, is the advice given by Mr. C. B. Williams, Chief of the Division of Agronomy.

Wheat does not do as well in this portion of the State as it does on the more compact soils of the Piedmont and Mountain sections.

Where one is to grow wheat in the eastern portion of the State, it is of the highest importance that it be sown on the fine grained and more compact loams and clay loam soils. One could not expect satisfac-
tory results on coarse sand, or black lands made up largely of humus material.

In sowing wheat in this portion of the State, or in any other portion, it will usually be the part of wisdom to wait until after a frost has oc-
curred. If sown before frost there will be danger of attack from the Hessian fly, which is one of the very worst enemies of the wheat crop.

The land should be prepared in advance, so that it will be some-
what compact below without being hard. Then just before sowing, have the upper three inches put in fine condition. Where practical do so, the seed should be put in with the drill using about one bushel of seed per acre.

For ordinary land, it is suggested that at least 200 to 300 pounds of fertilizer be used per acre.

Good varieties to use of the smooth headed type are Purple Straw, Leap's Prolific, and Fultz; and of the bearded type, Fulca-
ter.

Even with the high price of wheat at the present time and the prospect of high prices during the coming year, it does not seem advisable to extend this crop to areas or types of soil not especially adapted to its growth.

GIRLS! LEMON JUICE IS SKIN WHITENER

How to make a creamy beauty lotion for a few cents

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug-store and two lemons from the grocer and make a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck arms and hands.—Adv.

\$100 Reward \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby de-
stroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address—F. J. CHENEY & CO., To-
ledo, Ohio. Sold by all druggists, 75c.

To Cure a Cold in One Day
Take LAXATIVE BROMO QUININE. It stops the Cough and Headache and works off the Cold. Druggists refund money if it fails to cure. R. W. GROVE'S signature on each box. 25c.

NOTICE TO HOG GROWERS

Dr. F. D. Owen, of Elizabeth City, Corrects Erroneous Statements Regarding Hog Vaccination.

Due to the fact that some parties wish to sell the farmers of the eastern section of North Carolina treat-
ments which will accomplish only temporary relief from the attacks of hog cholera, they have at-
tempted to create distrust of the methods advocated by Dr. F. D. Owen, who has in charge the work of eradicating hog cholera in this section. Dr. Owen wishes to warn all hog growers against being misled by false or unfounded reports, and has issued the following state-
ment in regard to the matter:

"It has been brought to my attention that someone has been advising the hog growers in the northeastern counties of North Carolina that the so called simultaneous treatment (serum and virus) for hog cholera, through which hogs acquire lasting immunity against the disease, will stunt or retard the growth of the animals, and that such treatment will also set up, in many instances, cases of chronic cholera.

"In my connection with the investigation and control of hog cholera since the inauguration of the work by the United States Bureau of Animal Industry, part of my duties have been to treat and supervise the treatment of thousands of hogs with the serum and virus. In all cases of treatment, careful observa-
tion of the herds is kept in order to determine the results on infected and noninfected farms. In no in-
stance has a single case been reported or observed where the simultane-
ous inoculation had in any way af-
fected the growth and development of the pigs or shoats so treated. Neither have I any knowledge of cholera being caused by this treat-
ment when done according to in-
structions of the State and Federal authorities.

"In order to be absolutely sure that available evidence does not warrant such advice to farmers, I took the matter up with the Bureau of Animal Industry at Washington and the office of the State Veterina-
rian at Raleigh. In answer to these inquiries I received letters reading practically as follows, which are published for the benefit of those who have received ill-advised in-
struction concerning the serum and virus method of treating hogs;

United States Dept. of Agriculture
Bureau of Animal Industry
Washington, D. C.
May 20, 1917.

Dr. F. D. Owen,
Elizabeth City, N. C.

Sir:—Receipt is acknowledged of your letter of May 26, stating that you have been informed that parties in North Carolina teach that the serum and virus treatment for hog cholera often produces the disease in chronic form, and is, there-
fore, more dangerous than beneficial; also that farmers are being advised that the serum simultaneous inoculation is liable to stunt or retard the growth of the animals.

These reports should not be taken seriously, because statements such as attributed to the parties in question are not based upon facts, and usually are not made by these with practical experience and full knowl-
edge of the subject.

It is a well known fact that suc-
cessful swine breeders in the prin-
cipal hograising districts of the West have abandoned the use of the serum alone method and will consider only the simultaneous inoculation in the treatment of their herds.

The Bureau has treated and supervised the inoculation of nearly half a million of hogs under various field conditions with very satisfac-
tory results, and in no instance have complaints been made of the serum-simultaneous inoculation hav-
ing interfered in any with the growth of the pigs so treated.

THE PATRIOTISM OF THE AMERICAN PRESS

The service rendered to the gov-
ernment of the United States in the sale of the Liberty Loan Bonds of 1917 by the press of the country is record evidence of the generous patri-
otism of the newspaper men of America. It is recorded in the pages of thousands of American news-
papers, many of them printed in foreign languages, from the largest daily to the smallest country week-
ly. The newspapers of the country "came across" with liberal dona-
tions of space in news, editorial, and advertising columns.

Newspaper men have observed with deep and peculiar pleasure the whole-hearted activity of men of their fraternity in the country in promoting the sale of the Liberty Loan Bonds. The influence and assistance of all publications in making the loan a success are simply incalculable. Their efforts greatly contributed to making it a double success in that it was not only largely over-subscribed but the Liberty Loan Bonds were placed in every community in the United States, in cities and in remote country districts, in mining towns and manu-
facturing centers, among farmers and country merchants as well as city bankers and large commercial and manufacturing houses.

It was a great educational cam-
paign. Readers of their county paper in their country homes, and new American citizens from papers printed in their old language, who in the evening spelled out the news in the great daily papers, were in-
formed of the purposes and objects of the Liberty Loan and instructed in the nature, value, and terms of Government Bonds, especially the Liberty Loan Bonds of 1917. The whole Nation has made a long stride forward in financial education through the Liberty Loan campaign of 1917 as conducted through the press of the country.

The country press which without compensation gave liberally of its limited space is equally deserving of praise with the larger papers. In their respective spheres all classes of publications in the country covered their field thoroughly and well. The press of America can look back on the work it performed for the Liberty Loan as a great public service, ably, thoroughly, and unselfishly performed.

William G. McAdoo,
Secretary of the Treasury.

Respectfully,
(Signed) J. R. Mohler,
Acting Chief of Bureau.
"Dr. B. B. Flowe's letter follows:
North Carolina
Department of Agriculture
Raleigh
May 28, 1917.

Dr. F. D. Owen,
Elizabeth City, N. C.

Dear Sir:—I am in receipt of your letter of May 26. After reading it carefully, I wish to state that I do not believe that serum and virus, if properly administered, would have any harmful effect whatsoever on the animals it is administered to.

I think that Eastern North Carolina will make very little progress if they rely solely on the use of the anti-hog cholera serum and eliminate the virus or simultaneous treatment. Nor do I believe that the use of the serum or the serum and virus, stunts or retards the growth of the hogs.

We could point out some very nice herds of hogs which have been treated with the serum and virus, and in this connection I will refer to the herd of swine at Pinehurst. I am sure the U. S. Department of Agriculture does not advocate nor endorse the position taken by the parties in question.

Very truly yours,
(Signed) B. B. Flowe,
State Veterinarian.
