

BANKS ORDERING HAND GRENADES

Over 175,000 Children in Fifth District Will Be Routing Enemy, Waste, During Summer Months.

Richmond, Va .- According to the latest available figures over five hundred banks in the Fifth Federal Reserve District have ordered supplies of hand grenade penny-savings banks that are to be used by the children for summer savings. The total number of hand grenades that have been ordered exceeds 175,000.

The plan of the hand grenade bank originated in the Treasury Department, and the banks are being distributed in this district by the War Loan Organisation here. Every school child under the age of seventeen years may, by applying at the local bank, receive one of these hand grenade penny-banks as a loan for the vacation period. If, during the summer, enough money is saved to purchase one or more War Savings Stamps the bank becomes the property of the

The banks are made out of real hand grenades that were to have been used against the Huns. With percussion cap and high explosive removed, and slots cut to receive and take out coins, they are now doing service against the enemy, waste, as banks for sav-

School officials all over the district are enthusiastic about the plan, as they feel that it will not only keep alive but strengthen the thrift ideals that already have been implanted in the minds of the children.

J. H. Binford, assistant superintendent of public schools here, has endorsed the scheme, in a recent letter sing the hope that all the banks in the district would co-operate by getting supplies of the hand grenades, as the school children are enthusiastic about securing them.

Government Much Interested In Series of War Savings Sesisties That Are Rapidly Being Organized.

Government officials at Washington are watching with no little interest the growth of a series of societies springing up all over the United States. They have already attained a membership that reaches well up into the millions

Treasury department officials are particularly interested in this movement, and it is fostered by that department. As soon as a society is formed the names of the president, secretary and each individual member are placed in the treasury department archives.

These societies are War Savings Societies, and the motive of each so ciety is Thrift. The government, in favoring these organizations, has not only in view the replenishing of the United States treasury through the sale of Thrift and War Savings Stamps, but the big idea is to cause each individual member to learn the value to himself of being thrifty.

The government is not seeking to capital from legitimate commercial enterprises. It does not want to the up vast sums. It is the person a never saved systematically that it is the most anxious to reach. This person can put aside the small amounts that he has been accustomed to spend, and this, drawing four per cent compound interest, will in an incredibly short time grow into a large enough sum to make the first payment on a home, or to provide a sum with which one may make a permasent investment.

tions as to how to obtain incre efficiency and prosperity may now be obtained by women on the farm, in any part of the country, from the home demonstration agents of the department of agriculture. Entering into the national savings movement with a sest that characterises all their work, some eighteen hundred of these home demonstration agents have been carrying the message of thrift into the farm houses all over the United States.

In appreciation of their voluntarity undertaken work, Director Braddock has written a letter to each worker, of commendation, which reads in part: "Thrift is primarily the people's concern. If thrift is to become a permanent national asset, the people's agencies and organizations must definitely assume their share of responsibility for inculcating thrift by including it in their program for action. Schools churches, business and labor organizations, fraternal societies and women's organizations, as well as agricultural workers and agencies, are already undertaking this work and are in close co-operation with the treasury department."

According to Mr. Braddock's letter, plans for the creation of savings facilities in the home are outlined as follows:

"1. Habit of saving first some part of income for future needs and of spending wisely for present needs.

"3. Home betterment fund, to secure, for example, running water in

"3. Savings plan for every boy and

"4. Savings fund in government securities for every family.

"5. Keeping of accounts to pro-mote wise spending and to increase savings.

"6: Safe investment of savings (Nes. 2, 3, 4) in government securities until money is needed; War Savings Stamps as a desirable invest-

EASY TO SAVE

By the same token that the best way to have anything is do it yourself, the best way to get ahead in the world is save regularly and invest wisely. Your children may be buying Thrift Stamps but the nickels and dimes and quarters they are able to save won't buy a new automobile or a home or a cultivator. The money to do that will not be saved unless you save it.

R's easy enough to save if you do it the W. S. S. way. Quarters planted in Thrift Stamps grow into War Savings Stamps and the interest makes them grow like rain does a summer flower. Save for that happy opportu nity. If you're not in a War Savings Society-get in one. Be with the

Summer Complaint in Children.

There is not anything like as many deaths from this disease now as before Chamberlain's Colic and Diarrhoea Remedy came into such general use. When this remedy is given with castor oil as directed and proper care is taken as to diet, it is safe to say that fully ninety-nin out of every hundred cases recover. Mr. W. G. Campbell of Butler, Tenn., says, "I have used Chamberlain's Colic and Diarrhoea Remedy Chamberlain's Colic and Diarrhoea for summer complaint in children.
