ROAD BUILDING

FEDERAL-AID ROAD PROGRAM

Secretary of Agriculture is Considering Tentative Draft of Rules and Regulations.

(Prepared by the United States Department of Agriculture.)

The secretary of agriculture is considering a tentative draft of rules and regulations for the administration of the federal highway act, approved last November, under which \$75,000,000 is appropriated for the construction of federal-aid roads, but will not promulgate them until he has conferred with representatives of the various departments. The secretary is impressed with the need for closest possible co-operation between the federal government and the states in the development of the federal-aid highway system called for by the act, and the value and serviceability of the system will not be jeopardized by a hasty decision as to the roads which will comprise it or the regulations to be followed in carrying out the purposes of the legislation.

Fifty million dollars of the appropriation became available January 1. The remaining \$25,000,000 was made immediately available upon approval of the act, November 9, last.

In formulating the fundamental rules which will govern the states and the federal government in administering the law, the Department of Agriculture is seeking the counsel of the state highway departments as represented by the executive committee of the American Association of State Highway Officials. Members of the committee are: George P. Coleman, state highway commissioner, Virginia; Paul D. Sargent, chief engineer, Maine; Austin B. Fletcher, state highway engineer, California; W. R. Neel, state highway engineer, Georgia; Thomas H. MacDonald, chief of the bureau of public roads, United States Department of Agriculture; George E. Johnson, secretary, department of public works, Nebraska; Ira R. Bowning, member of highway commission, Utah;

A Modern Machine Working on a Rutty Highway.

R. J. Windrow, state highway engineer, Texas; W. D. Ubler, state highway engineer, Pennsylvania; and D. P. Olson, director, bureau of highways, Idaho.

Pending definite decision upon details of the federal highway system, each project submitted by the states will be examined with the utmost care by the bureau of public roads to determine whether it is likely that the roads proposed will come within the federal system as finally selected. The department regards the approval of this system as of great importance. Each project submitted in advance of the definite decision upon the system as a whole will have an effect in fixing particular routes and so determining the system. Location of the projects, choice of routes, and character of improvements proposed will be given close study.

Each state highway department has been requested to submit as soon as possible to the Department of Agriculture a tentative map showing routes proposed for primary and secondary systems. In examining and passing upon these recommendations special consideration will be given to social and economic questions involved, such as service to population, established trend of traffic, existing industries, natural resources, etc. In considering plans for individual projects special attention will be devoted to grade crossings, gradients, curvature, bridges, general drainage conditions, location of materials, supplies, etc.

Much Money for Roads.
Receipts of the automobile division of the Pennsylvania highway department reached the enormous total of \$9,377,401 last year, the largest in the history of the division. This amount is an increase of more than \$2,000,000 over the receipts of 1920.

Cleanliness Leads to Success.
Given a chance, poultry will return good profits on the investment. Cleanliness is one of the best guarantees of success.

Roads Built in 1921.
Nearly 28,000 miles of good roads have been constructed in this country in 1921.

Fight High Freight Rates.
Good roads are the weapons which farmers need to fight high freight rates.

QUIT MEAT WHEN KIDNEYS BOTHER

Take a glass of Salts before breakfast if your Back hurts or Bladder is troubling you.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which excites the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.

A GOOD TONIC FOR OLD PEOPLE

Gude's Pepto-Mangan Restores Strength and Prevents Illness

Aged people often need a good blood tonic. When the blood becomes clogged with poisons from the system, Gude's Pepto-Mangan purifies it by driving off the waste matter. Good blood is full of vitality and prevents illness, giving the body greater power of resistance. The weaknesses of old age are greatly helped by a supply of rich, red, blood. Gude's Pepto-Mangan is sold in liquid or tablet form by all druggists. It has been recommended by physicians for 30 years and is a valuable tonic and builder for the weak and run-down of all ages from childhood to old age. Advertisement.
