EAT LESS MEAT IF BACK HURTS

Take a glass of Salts to flush Kidneys if Bladder bothers you—Drink lots of water.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders. Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

U. S. MEDAL FOR VERDUN

MAKING SUCCESS OF GARDEN

Soils Must Be Deep, Mellow and Friable and in Crumbly State When Plowed or Hoed.

The success of a garden is largely due to the manner in which the soil has been prepared. The soil must be deep, mellow and friable, so that it will be in a crumbly state when plowed or hoed. That is, the minute particles of the soil must be granular, each maintaining its form and consistency. When such soil is wet, each portion is enveloped by a film of water which is retained for some time. The plant food is thus dissolved and this water-laden plant food is taken by the roots of the plants.

LIMITED SUPPLY OF MANURE

Behooves City Gardener to Secure Fertilizer Needed for Soil in His Garden Plot.

The supply of manure in cities is now quite limited, and it behooves the city gardener to secure enough somewhere to fertilize his garden plot, especially if his soil is heavy and lacking in organic matter. Where manure cannot be obtained, a number of crops, such as Irish potatoes, beans, peas, and tomatoes, can be grown fairly well by the aid of commercial fertilizers. Street sweepings are unsafe to use if they contain much oil or tar—United States Department of Agriculture.

STRIVE TO MAKE ROADS SAFE

Campaign in State of Massachusetts for More Comfortable Conditions After Dark.

In a campaign to make the roads of Massachusetts safe and comfortable for night driving, automobiles from other states must have the proper light equipment devices approved in that state before they are allowed within the limits of the commonwealth.
