When the horse-car squealed aloud REMEMBER it? The flanges squealed as the car rounded a curve. The hand-brakes squealed when they were applied and groaned when they were released. The springs complained always. What was the matter? Friction, mostly. Just friction. Now in 1923, the transportation picture is quite different. So great has been the increase in motor transport during the last ten years that the country's investment in motor vehicles is now greater than the investment in rolling stock of all street railways and steam railroads combined. Without improved lubrication this development would have been impossible. This company has spent years in the perfecting of Polarine, the "Standard" oil for motor lubrication. It prevents wear and makes all the power effective. Ask for Polarine—not "a quart of oil". STANDARD OIL COMPANY (New Jersey)
