THOSE WHO KNOW

The Chief Mechanic

knows that poor lubrication is to blame for about 75% of all motor repairs. You use oil to protect the motor. If it doesn't there's something wrong with the oil. Polarine does definite things—improves the performance of motors, lengthens their life, keeps repair costs down, postpones overhauling, gives you better compression and more power from your gasoline, holds its body longer. Polarine is the reasonably priced, quality oil. Be sure you get it—ask for it by name.
