Balanced Propellers Speed the Leviathan
Balanced Gasoline speeds your car

PERFECT balance means power and flexibility to a ship—lack of it, vibration and waste. Big balanced screws drove the Leviathan to a new long-distance record. "Standard", the Balanced Gasoline, will not only drive your car to new mileage records but give it a smoothness and flexibility that only a balanced fuel can furnish. "Standard" starts with the spark, sweeps along fast on the pick-up, pours out power on the hills and has the staying qualities for long runs at full speed and low mileage cost. It throttles down to a standstill and burns clean whether your car is idling, tearing along wide open or running fast-and-slow in traffic. A perfect motor fuel must be balanced to have all these qualities. "Standard" is correctly balanced—the result of years of painstaking research and the utmost skill in manufacturing. Down town or 'cross country you can safely stick to "Standard".
