The cannil being out is 40 feet wide at the bottom and 90 feet at the top, and completes in semi-circle shape a distance of 41 miles. The elec ris plant is now in operation and a night force was put on Monday, so that the work may be pushed 24 hours in every day.

The town of Whitney is already assuming vast propertion, and every convenience available is being instituted. Last week a small ice plant began operations, with a capacity for all immediate needs.

Work has begun on one of the large dans at the head of the race. Sees ral cofferdams have been received by the company and are being used for bhasting. With them, water is primped out from a confined space, leaving the river bed dry, for convenience of the work.

It is an interesting item to know that in the work on the dams over 40,000 barrels of coment will be used.
