You ever stop to think that 99 out of every 100 piano agents don't know any more about a piano than you? We find from actual statistics not one person out of every 10,000 can tell the difference between a good piano and a poor one unless compared side by side, and many buyer don't have this opportunity.

If you write to STEIFF before buying a piano, you will run no risk. He has been making pianos for 63 years and the Steiff is the recognized standard the world over, sold only by its maker direct to you.
