

NEW PHASE OF ROAD WORK.

New Agricultural Department Will Use Collection of Lantern Slides.

There is a phase of the road work of the department of agriculture that from now on will receive more attention than ever and will be of the greatest interest to every community in the United States that expects to build a road, and especially to the agricultural colleges that are helping in this work, says the Washington Star. It is the lantern slide department of object lessons and missionary work. The road office since its establishment has accumulated one of the most unique collections of lantern slides on the road question that have ever come together. There are pictures from all over the United States, and many from abroad, showing roads of all sorts, good, bad and indifferent. Some of the bad roads of the United States, by the way, are about the worst in the world. There are pictures of roads in all stages of construction, showing the material used and how it is put together and the machinery used in the work. There is every phase of material getting, from the work of the convicts blasting out rock at the Polesham penitentiary to the latest improvement of rock crushing machinery.

There are enough of these slides to furnish a dozen series of pictures, each a lecture in itself on road building, the need of roads, the difference in transportation that the coming of good roads has made and the history of roads and transportation all over the country. These pictures are being arranged in series and will form an illustrated circulating library for the agricultural colleges of the country that want them. They are to be loaned out to the col-

leges, with or without lectures accompanying them, and will form a valuable auxiliary to any school that is teaching roadmaking, besides making an interesting lecture for the community at large, and the smaller towns especially are very much alive to this sort of entertainment and education. The set of slides is a collection that none of the smaller colleges could ever get for themselves, both on account of the prohibitive cost and the difficulty of finding just what they wanted to illustrate a particular phase of the work at a given time. It is the sort of thing that the government, with agents everywhere, can get together at comparatively little trouble and expense, and it will be made available for use in a score of colleges year after year at practically no expense to the government and none at all to the school.

Value of Good Roads to Property.

The question "Do good roads pay?" is being continually demonstrated by such facts as this, taken from a Florida paper: J. C. Sloth, the real estate broker, could have bought a certain tract of land a few months ago at \$600. An "object lesson" road was built in the locality, and he was authorized by a client to pay \$3,200 for it, but found when he made his tender that it had just been sold for \$2,700. The value had been enhanced by an amount sufficient to pay for half a mile of improved road, and the gain on value of half a mile of abutting property at the same rate would pay for ten miles of good roads at the same cost.

Rural Delivery Notes

England has a rural mail delivery daily except to very distant farmhouses, which are served triweekly. The states in the northern part of the Mississippi valley are the ones in which the rural free delivery business has been extended the most. Illinois leads all other states with 2,608 routes in operation. Ohio is second with 2,392. "Rural free delivery has made a considerable difference in the amount of memorizing that postal clerks on Indiana routes have to do," said one of the number, according to the Indianapolis News. "Five years ago there were 2,202 postoffices in Indiana whose names we had to remember, and now there are only 1,604. The reduction of over 500 offices is due to the rural free delivery."

Miss Susie M. Stoltz is the only woman rural mail carrier in Illinois or in Wabash county, says the St. Louis Post-Dispatch. Miss Stoltz is nineteen years old. Her home is at Gard's Point, ten miles northwest of Mount Carmel, in Wabash county. She has had a route out of Mount Carmel for the past eighteen months and in all that time has only missed one day. That was when she went to a convention of rural carriers at Olney. Miss Stoltz's route is twenty-six miles long. She drives that distance in a buggy every weekday of the year, in sunshine and rain, through food and mud and snow and ice.

Oxydonor.

Oxydonor builds up the system by natural means. It causes the absorption of oxygen through the pores of the skin, membranes and lungs, thus strengthening the entire system and making it naturally healthy.

Oxygen is Life's Necessity—without it man dies; but when the blood is well filled with it, man lives in the enjoyment of health.

Oxydonor will benefit or cause the cure of any disease at any reasonable stage. Rheumatism, Sciatica, Neuralgia, Asthma, Catarrh, Hay Fever, Indigestion, Dyspepsia, all nervous diseases, Blood, Skin, Liver and Kidney diseases, Female Complaints, etc.

So many of our family have been sick, I have badly needed another Oxydonor. Those on whom I used the Oxydonor got along fine, others had to resort to medical aid having but one Oxydonor. The consequences were the loss of one of our babies. I shall always regret the use of medicine. I hope I shall never be forced to call another doctor.

I have found great benefit from the use of Oxydonor. I was cured of a severe case of Rheumatism which has never returned. Oxydonor has been a general benefit in our family.
