## NEW STYLE GRAFTING.

Successfully Used in Colorado—Commended by S. B. Green.

At the recent meeting of the American Pomological Society the following method of grafting was described by a gentleman from Colorado, who stated that it was the most successful method that he had employed in top working old orchards and that it could be used on branches as large as four inches in diameter with great success. It impressed me as being far better than ordinary cleft grafting, especially for

large stocks, from the fact that the surfaces of the union were all smooth and the scions held more firmly. The method of procedure is as follows: After determining where the graft had better go, the stock is cut off with a fine saw and the cut made in the side of the stock, as shown at A. This is then cleaned out with a knife, as shown at B. A saddler's knife is used for this purpose, the outline of which is shown at E in the second cut. The scion is cut as is usual in cleft grafting and is driven with some little force into the groove in the stock, as shown at C and in the cross section at D.

It will be found that after this graft has been driven in it can only be pulled out by using considerable force, and it is held much more firmly than in the

ordinary cleft graft. This method of grafting is undoubtedly well adapted to take the place of cleft grafting for all stocks over three-quarters of an inch in diameter. If you try it you will be surprised at the firmness with which the scion will stick in the stock. All wounds should be covered with wax as in ordinary cleft grafting.—S. B. Green in Farm and Fireside.

**How to Run an Incubator.**  
The average farmer, his wife, his son or his daughter should not expect to learn all about the management of an incubator from the perusal of written pages. Experience comes from the work itself. This work is easy, interesting and fascinating. It occupies the mind and leads to investigation. More than that, it leads to success and profit. But great results cannot be expected in the beginning. The poultry business is a trade and must be learned. Many a person is idle today and looking for some sphere of usefulness who could learn how to operate an incubator to both mental and financial advantage. But the work, slight as it is, must be done properly and at the right time. The poultry business is honorable and profitable, but it requires study and experience. We serve a long and faithful apprenticeship to learn other more laborious and less remunerative trades, when the same amount of application would in less time make us experts with an incubator and give us a trade in a line not affected by strikes or lockouts or liable to be overcrowded.—Richard H. Wood, M. D.

**Changes in the Middle West.**  
A striking tendency in the middle west, and especially in southern Iowa, is the decrease in the size of farms. Something less than ninety acres is said to be the size of average Iowa farms, with the men doing the work themselves or hiring one man. An exchange says that since land has risen in value from \$10 to \$100 an acre it has been found necessary to decrease the number of acres in the farm, and the farmer himself is better off for this, because he is not working so hard to make both ends meet nor trying to cover so much ground. He is making, in fact, about as much on 100 acres rightly conducted as he did on a section of land in the old days. The great growth of dairying has helped to bring about this change.

down pains are a symptom of the most serious trouble which can attack a woman, viz: falling of the womb. With this, generally, come irregular, painful, scanty or profuse periods, wasteful, weakening drains, dreadful backache, headache, nervousness, dizziness, irritability, tired feeling, inability to walk, loss of appetite, color and beauty. The cure is

# WINE OF CARDUI

that marvelous, curative extract, or natural wine, of herbs, which exerts such a wonderful, strengthening influence on all female organs. Cardui relieves pain, regulates the menses, stops drains and stimulates the womb muscles to pull the womb up into place.

It is a sure and permanent cure for all female complaints.

So many of our family have been sick, I have badly needed another Oxydonor. Those on whom I used the Oxydonor got along the others had to resort to medical aid having but one Oxydonor. The consequences were the loss of one of our babies. I shall always regret the use of medicines. I hope I shall never be forced to call another doctor.

I have found great benefit from the use of Oxydonor. I was cured of a severe case of Rheumatism which has never returned. Oxydonor has been a general benefit to our family. Respectfully,
