Locusts Predict Much Sickness

The seventeenth-year locust is scheduled to appear this year. It is purely America. The earliest mention of the cleada was in 1669 when in Cambridge, Mass, a memorwhen in Cambridge, Mass. a memorial was printed recounting the many deaths during the Spring and Summer It was in 1633 that the pests appeared and destroyed the green follage, and the Indians predicted much sickness, which followed in June, July, and August. It was a kind of pestilent fever which cau sed large numbers of deaths.

The Cheerful Man

It is very much like some of our Radical contemporaries to copy the last five lines of an editoral and hen with a muck rake drag them a lot of misrepresentations and send the whole foul mess the rounds of the Republican press. Given a hard nut to crack they in-varibly hold a war dance around the shell not daring to handle the kernel. It is manifestly animally and unfair to quote a few sentences meaningless in themselves and build on them for the purpose of creating false impressions, but it is entirely in keeping with the sort of thetics obtained in sanctums where sumsobtained mic weekly newspapers are born in the brains of a few Republican stockholders, edited by jucks of all trades and where they eke out a precarious living passed up by a handful.—Dispatch.
