Victory For Reform.

Political conditions in South Dakota are much like those in Wisconsin and Iowa. The Republicans are badly split on the tariff question and the Insurgents won a complete victory in the last state convention. The Mitchell Galacter of the Democratic papers may last state convention. The Michell Ga-sette and other Democratic papers gave ald and comfort to the reformers in the ante-convention campaign, and the vic-tory for reform over protectionism and graft is a long step toward the com-

Judge William Timin of the supreme court of Wisconsin made an address before the students and faculty of Ripon college the other day in which be declared that in his opinion the courts of the country need to undergo a course of training to learn that the imprisonment of rich criminals is not sacrifice. They have an elective judiciary in Wisconsin, and Judge Timlin is new to the supreme bench. If he had gained a life tenure in his office as a reward for serving the railroads and trusts he would hardly feel so infernally independent.

There are persons who maintain that it is tille to attempt to show a connection between Republican polities—or polities—and the disgraceful records of current events, including such matters as the revelations concerning the Chicago packing houses and the "graff" shown in relations between Pennsylvania rallessed affectal sand coal and coveres. Indeed there are those who assert that such attempt would not cally be fraidless, but would be nothing more dignified prefudes.

Cost of Living Advanced - Monopoly

the Chief Cause.
The cost of living is now 47 per cent igher than on July 1, 1897, without including rent, though it is safe to say that rent keeps pace with the increased cost of building materials. As every one pays these increased prices, it is important to know what has caused such an enormous advance. It should be first noted that the present trust fostering tariff law went into effect July 24, 1807, and that almost immedistry the price of all protected arti-cles began to advance in this country, although there was no similar rapid mivance of prices in other countries. As this tariff his protected the Amer-ican producers from competition, it was very natural that they should incause the price they charged for their products to the point where foreign goods could be imported and pay the freight and costs and also the tariff duties, averaging over 50 per cent. The large profits possible under the

protective tariff induced the formation of trusts and combines to control the home market, and this monopoly adsteed prices to the highest limit. No cures or argument are necessary to rave the advance in prices. Every w who buys feed or clothing or pays entelliance of the large increase from our daily experience. It is most ex-varing also to know that the trusts is boundaries, which produce about all is not exceptible and invuries of life, are I continue, which produce about all a cresities and inxuries of life, are ling their surplus atoels, after the seam possible have bought all they arised, at much lover prices to formers than they charge our own possible that here is a class to a the original to the continue to the continue
