MACHINE POLITICS.

G. O. P. Reformers Get No Aid From Republican Clubs.

The National League of Republican Clubs, whose ardent stand-patism gives them a call upon the protected monopolies for the shrews of war, are still doing business at the old stand. They have elected General McAlpin president, and the old war horse says he is proud of "the aroused Republican party of 1906." Not for years, he thinks, have the "great principles sounded by Lincoln" come home so convincingly to the party leaders.

Does General McAlpin mean by this that he and his Republican club members will vote the Lincoln Republican ticket in Pennsylvania, which is opposing the party machine of Penrose? Are the clubs for Governor Cummins of Iowa, who is fighting the battle of the people against the railroads and is being denounced by the Republican machine politicians and the administration and especially the stand pat faction of the Republican party? Do General McAlpin and his clubs lend their comfort and aid to the Colby reformers in New Jersey or to the Republican machine headed by Senator Dryden, the life insurance magnate, and his allies, the railroads and corporations? Will they help Winston Churchill in New Hampshire or the corrupt Republican ring backed by the Boston and Maine railroad? Will they help Clement in Vermont and the reform Republicans in other states, all of whom are independents trying to arouse the Republicans to a sense of honesty and decency?

Of course they will not. General McAlpin and his clubs will be found backing the regular machine ticket everywhere. In fact, the clubs are part and parcel of the Republican machine and are furnished money by it to whom 'er up for those candidates of the G. O. P. who bear the stamp of machine regularity. It's all nonsense to talk of "the aroused Republican party of 1906" or the "great principles sounded by Lincoln" when the whole efforts of the clubs will be used to defeat those who are "aroused" and striving to arouse their fellows to follow "the principles of Lincoln."

In all the states the real reform Republicans, who believe in principles sounded by Lincoln, are either openly allied with the Democrats or at least are vigorously fighting the regular Republican ticket. General McAlpin and those of his club members who are independent enough to fight the Republican rings in the several states must resign their membership in the Republican clubs before they will be free to espouse the "great principles sounded by Lincoln."

Does any honest man doubt that Lincoln would be found, if on earth today, fighting with reformers and against the Republican machine?

ARMOR TRUST AHEAD.

How the Roosevelt Administration Divided the Swag.

The armor plate trust has won out in its fight with the rival Midvale company and has been awarded one-half the armor plate contract. The Midvale company's bid was \$47 a ton lower than the bid of the Carnegie company and \$58 a ton lower than the Bethlehem company proposed to supply plate for, but of course the trust, represented by the two last named powerful interests, was too potent with a Republican administration to be turned aside. There is some satisfaction that the trust had to accept the same price as the Midvale company offered, which is \$200 a ton less than the trust charged the government before there was competition. Whether any dicker was made with the trust to pay a bonus to the Republican campaign fund for this favor has not yet developed.

How the armor trust has plundered the government by its extortionate charges is shown in the following table:

Table with 2 columns: Item and Price per ton. Includes Bethlehem company's bid, Carnegie company's bid, and Midvale per ton.

It is almost as difficult to dislocate a trust from connection with the United States treasury when in charge of a Republican administration as it would be to remove a mountain.

Remember that this is a reform administration which boasts of its square dealing on all occasions, but when it comes to speckling a trust that has been plundering the people for years there is a compromise by which the defeated trust is given half the profit. Is that a square deal for the Midvale company?

Roosevelt Now a Protectionist.

New Zealand, through her prime minister, has offered to reduce her tariff on our goods to the same preferential duties as she grants England. But after an interview with President Roosevelt the prime minister declares, "Reciprocity is not an easy thing to bring about with this country." Evidently the president told his visitor that to let in New Zealand wool at a lower duty would disturb the whole protection fabric and that the stand patters, who control the Republican party, could not think of permitting it. Trade, however favorable to our manufacturers or exporters, which would come through meddling with the monopoly the trusts and combines now enjoy. From this we may draw the conclusion that President Roosevelt has now joined the Protective Tariff league in spirit if not in fact, and the only hope of tariff revision must come through a Democratic congress.

IT IS USELESS TO DENY

That banks offer greater security for money than anywhere else. You might lend money at a big profit; you might buy real estate on a rising value, and you MIGHT invest in gilt-edged bonds with good security; but you CAN'T lose money when it is safe in bank, and you MUST win profit while it's earning interest. Two most convincing proofs that banks offer the best security for your money. This bank does.
