The above series is considered one of the most valuable contributions to the cause of education which has ever been published in this country.

Each book of the series is complete in itself, and has a full glossary speeded. The illustra-

tions are numerously and beautifully executed.

Teachers are requested to call and examin these works before selecting for their schools any book on Natural History, these bing very cheap, and having been approved by detinguished and

eientific men.
"I have examined Dr. Ruschenberger's publication - Elements of Goology, - from the text of Boudant, Aliner, Edwards & Achille, Compte. 'I think this an excellent work—condensed, lucid, exact, and comprehensive—a safe guide for the pupil, and a useful review for the teacher.— The illustrations are immerous and exact.

(Signed) B Yale College, Dec. 12, 4845. B. SILLIMAN. The above valuable series of books have been introduced into many of the public and private schools of New York, Massachusetts, Vermont, Maine, Ohio, Pennsylvania, Litmois, Indiana, most valuable series ever issued from the Ameriona press:

By William Grirnshaw, Esq., author of the above histories.
The editor of the North American Review,

speaking of these Histories, observes, that—"A mong the elementary broks of American History, we do, not remember to have seen any one more deserving approbation than Mr. Granshaw's History of the United States. It is a small volume and a great deal of matter is brought into narrow space but the author has succeeded so well in the construction of his periods, and the arrangement of his materials, that perspicuity is rarely sucrificed to brevity.

"The chain of narative is skilfully preserved, and the author's reflections are frequently such

as make the facts more impressive, and lead the yauthful mind to observe causes and consequences which might otherwise be overlooked. As school-book, it may be justly redominended.
"What has been said of this volume will apply generally to me other historical works. They

are each nearly of the same size as the one just noticed and designed for the same object, that is, the us of classes in echools."

All these books are accompanied with very

full and well digested tables of questioning for the heafit of pupils, and also will Keys to the same for the convenience of tenchers.

[Feschers generally, who have c amined Mr. Grimshaw's Histories of the United States and England, and improved editions of Goldsmith's Greece and Rome, have given them a decided eference to any other Histories in use as school books, and any person who will examine them, will find about one thousand errors in each corrected; and teachers ordering these works, will do well to say, "Grimshaw's Improved Eds."
