than others in worldly goods; and, as property will positaries of the patriotism and guardians of the honor of their country; they will have done too much in the field to deliberately disgrace it before themselves.

Nor would the Confederacy be permitted to-repudiate its debt, even if it desired to do so ever so much. The aunouncement of peace will send millions of our treasury notes and bonds abroad. The domestic holders of money and bonds will immediately and eagerly barter them in exchange for all sorts of merchandize; and thus a considerable portion of the public debt will soon be held by the inhabitants of other countries, whose Governments will paoteet them in their rights. The Confederacy will be too much enamored of peace to heedlessly rush into war with half the great powers of the world, for the sake of avoiding an honest debt which it could support without inconvenience.

In modern times it is only the interest on public debt that represents the burden to be borne. The interest upon the Confederate debt will be about a hundred millions a year. - To show how easily this could be paid, it is only necessary to state that an export duty of five cents a pound on cotton would more than produce the sum, and this export duty would fall upon the consumers of cotton abroad and not upon its producers at home. This small export duty would pay the entire interest on the public debt, and leave the other staples and property of the country free to such taxation as may be deemed necessary for sinking the principal of the public debt. Our independence will establish direct trade between the South and Europs, and we shall save the tribute and protective bounties which we formerly paid in a thousand forms to the North. This very saving will be greater than the taxes which we shall have to pay for maintaining the public debt, and will enable us to meet the taxation without feeling its burden. Nothing is more clear than the fact, even if the Coufederate debt should reach two thousand millions of dollars, it will be suported with more case than any other country ever before maintained a debt of ouly a third the proportinate magnitude. The publie debt, therefore, will not be repudiated by the Confederacy for three reasons, namely: there will be no necessity for repudiation; the people will be too proud of the glory and reputation of their country, thus to bring it to shame; and repudation would not be permitted, even if the Confederacy were base enough to desire it. The wan who fears repudiation shows at once bis ignorance of public affairs, and slanders his country .- Richmond Examiner.

The correspondent of the Cincinnati Gazette, in journeying to Chicago with many members of the Democratic Convention, was much impressed with their conversation. He says: But the saddest thing in all this political talk was the evident delight at our military failures. I do not write the words willingly: for, realizing profoundly that this reballion can be put down by no party and by no effort that stops short of embracing the people of the North, I know how fully it is admitting that the cnd of these troublons times is not yet in sight.
