

Sunday Reading.

CHRIST'S SYMPATHY WITH HIS PEOPLE.

I have been thinking of Jesus and reflecting upon his character, as a sympathizing Saviour. While passing through this rough and stormy world, how much the Christian needs the sympathy of Christ; he cannot live in the enjoyment of his love without his help and sympathy.

There is evidently a tendency with many at the present day, to exalt words above regeneration, and to cut loose from the great doctrines of the Gospel—repentance and faith in God, and their exhibition in the fruits of a well ordered life and godly conversation.

Christ has no sympathy with the spirit of the world. The Scribes and Pharisees could never draw him into the contentions of political parties.

How differently would it be with the church, if Christians lived for Christ and labored for the conversion of sinners to God, as is their privilege and duty to do.

Let Christians and ministers come up to the standard of duty as exemplified by the life and preaching of Christ and the Apostles, and we need not fear the great moral evils that are coming in upon us.

Humble praying Christians, who long and labor for the conversion of the world and for the welfare of Zion, may be assured of the sympathy of Jesus, and that he will stand by them, and strengthen their faith and encourage their hearts to labor yet more abundantly for him, and they will at last receive a rich and full reward in the approbation of their Lord, who will say unto them, "Well done good and faithful servants, enter thou into the joy of thy Lord."

EPICURATORY PRAYER.

It may be proper to interpose a word or two on the subject of ejaculatory prayer; by which we understand that secret and generally silent lifting up of the heart to God, which the Christian often prays to be necessary and profitable when he is unable to retire from the society and the business of the world.

Learn Now—A little boy, blind from birth aged about four years, died. About an hour before the little sufferer departed, he exclaimed "De! I see they have; there's no no good day to come."

He that knows his own heart best, and reads his own life most honestly, and above all, judges truly as well as charitably, will be the last to condemn.

Withhold not good from them to whom it is due, when it is in the power of thine hand to do it.

Agricultural.

WORK FOR SEPTEMBER.

THE PLANTATION. Cotton, now beginning to open fully, must be gathered without delay. Avoid picking immediately after a shower, lest the lint should be dirty.

One Year should be gathered and put away during the brief intervals of leisure from cotton picking. The vines of late planted Peas may also be cut when the pod is just forming, and cured for hay.

Winter Oats, Rye, Barley, Clover and Lucerne may be sown the latter part of this month.

Turnips for a fall crop, must now be sown, without delay. The Blue Bags, Yellow Aberdeen, Norfolk, Early Flat Dutch, Globe and Strap Leaf Red Top Turnips are all valuable varieties—the two first being the best for stock and long keeping.

Hay—In addition to the Corn-stalk and unpeeled fodder, Sweet Potato vines and the top of Pinders make a tolerable rough forage, if cut and cured before they begin to wither.

Put Limes may now be drained, woodlands prepared for pasturage, woods and brush grubbed up, &c., &c.

Winter Forage—As a green crop, try Wheat, sown thick in 3 foot drills, on deeply plowed and rich land. It will give your animals green food nearly all winter, bearing repeated cuttings.

THE GARDEN.

Turnips, of all kinds if not already sown, must be put in without delay.

SALTING HAY.

We frequently find notices of salting hay, and also of the injurious effects, in many instances, resulting from it. We give from the farm report of L. D. Cliff, of Putnam county, in the volume of Transactions of the Society for 1855, a preparation that has proved highly beneficial, and obviates the difficulties attending the use of salt:

PREPARATION FOR HAY IN THE MOW.—I have used, for several years, the following preparation for my hay: Two parts of slacked or quick lime to one of salt. The salt to be mixed with the lime until entirely dissolved and the mass becomes a powder. Upon a load or ton of hay, at intervals in mowing or stacking, use from ten to fifteen quarts, dusted evenly over the hay. I formerly used salt alone, but the men would often use too much, so that it was injurious to the stock. The above mixture obviates this—it corrects the acidity and sourness of the hay, and I do not recollect a sick animal since I commenced its use.

VINEGAR PLANT.

We spoke last April of a Vinegar plant given us by a lady friend of Webster. We took it home to our office, procured from an apothecary's store one of his largest glass jars, holding some two gallons, filled it with common sweetened water, committed the plant to it, and there it has been ever since spreading its folds upon the surface, till it was evident the vinegar had become strong enough almost for the death of the plant; whereupon, this week, we removed the original sweetened water, and supplied its place with new for the plant to work upon.

We would like to obtain such a plant—Can't the Editor of the Arator obtain one for us.—Ed. N. C. Waig.

THE JAPAN PEA.

We think this Pea has been much underrated, especially at the North, where the season is too short to grow it in perfection. Here it grows luxuriantly and matures perfectly, yielding an extraordinary return, when properly cultivated. They should not be gathered until the pods begin to shrivel, when they may be carried to the barn or other out house, and threshed with the flail. They are very excellent for the table even when a year old, if prepared as follows:—Soak in water over night, and boil next day three or four hours; serve up with butter, or place them in the oven, with a few slices of bacon, until slightly browned, then baked beans.

We are under obligations to the commissioner of Patents and to R. Peters, Esq., for a supply of seed, but have none left for distribution.

The English Agricultural Society has offered a premium of £500 for the best steam plow, so satisfactory invention of such a machine having been brought forward in that country.

NEW PLATFORM OF THE AMERICAN PARTY.

1. An humble acknowledgment to the Supreme Being who rules the universe for his protecting care vouchsafed to our fathers in their successful revolutionary struggle, and hitherto manifested to us, their descendants, in the preservation of the liberties, the independence, and the union of these States.

2. The perpetuation of the federal Union and Constitution as the palladium of our civil and religious liberties, and the only sure bulwark of American Independence.

3. Americans must rule America, and to this end native-born citizens should be selected for all State, federal and municipal offices or government employment, in preference to all others; nevertheless,

4. Persons born of American parents residing temporarily abroad should be entitled to all the rights of native-born citizens; but no person should be selected for political station, (whether of native or foreign birth), who recognizes any allegiance or obligation of any description to any foreign prince, potentate or power, or who refuse to recognize the federal and State constitutions (each within its sphere) as paramount to all other laws, as spheres of political action.

5. The unqualified recognition and maintenance of the reserved rights of the several States, and the cultivation of harmony and fraternal good will between the citizens of the several States, and to this end, non-interference by Congress with questions appertaining solely to the individual States, and non-intervention by each State with the affairs of any other State.

6. The recognition of the right of the native-born and naturalized citizens of the United States, permanently residing in any Territory thereof, to frame their constitution and laws, and to regulate their domestic and social affairs in their own mode, subject only to the provisions of the federal constitution, with the privilege of admission into the Union whenever they have the requisite population for one representative in Congress. Provided always, that none but those who are citizens of the United States, under the constitution and laws thereof, and who have a fixed residence in any such Territory, ought to participate in the formation of the constitution, or in the enactment of laws for said Territory or State.

7. An enforcement of the principle that no State or Territory ought to admit others than of the United States to the right of suffrage or of holding political office.

8. A change in the laws of naturalization, making a continued residence of twenty-one years, of all not heretofore provided for, an indispensable requisite for citizenship hereafter, and excluding all paupers and persons convicted of crime from landing upon our shores; but no interference with the vested rights of foreigners.

9. Opposition to any union between Church and State; no interference with religious faith or worship; and no test oaths for office.

10. Free and thorough investigation into any and all alleged abuses of public functionaries and a strict economy in public expenditures.

11. The maintenance and enforcement of all laws, constitutionally enacted, until said laws shall be repealed, or shall be declared null and void by competent judicial authority.

12. Opposition to the reckless and unwise policy of the present administration in the general management of our national affairs, and more especially as shown in removing "Americans" (by designation and consociating foreigners and ultraists in their places; as shown in a trucking subservience to the stronger, and an insolent and cowardly bravado towards the weaker powers; as shown in opening sectional agitation by the repeal of the Missouri Compromise; as shown in granting to unnaturalized foreigners the right to Suffrage in Kansas and Nebraska; as shown in its vacillating course on the Kansas and Nebraska question; as shown in the corruptions which pervade some of the departments of the government; as shown in disgracing meritorious naval officers, through prejudice or caprice; and as shown in the blundering mismanagement of our foreign relations.

13. Therefore, to remedy existing evils, and prevent the disastrous consequences otherwise resulting therefrom, we would build up the "American Party" upon the principles hereinbefore stated.

14. That each State Council shall have authority to amend their several constitutions so as to abolish the several degrees, and substitute a pledge of honor instead of other obligation, for fellowship and admission into the party.

15. A free and open discussion of all political principles embraced in our platform.

Ho! for Kansas!

ROBERT SHAW takes this opportunity of informing the public generally, and all who intend going to Kansas to participate, that he is ready to continue the

SADDLE & HARNESS BUSINESS.
