

LETTERS RECEIVED FROM THE SLAVE TRADE

Mr. Robert A. Morrison, presented at the meeting of the British Association, a paper on the subject of the slave trade...

North Carolina Edwig.

CHARLOTTE.

Tuesday, November 18, 1858.

Banking.

Gov. Bragg of this State, by Proclamation, has appointed Thursday, the 25th instant, as a day of "Solenn and public Thanksgiving to Almighty God" for his manifold goodness to us during the past year.

Superior Court.

The Fall Term of the Superior Court for this county, is now in session. His Honor Judge M. Manly presiding. There is no important case on the docket that we have heard of.

State of our citizens.

Some of our citizens gave a complimentary Ball, to Judge Ellis and lady, on Wednesday night last. The company was large and every thing passed off in the finest style.

Mecklenburg County Fair.

The Fourth Annual Fair of the Mecklenburg County Agricultural Society, came off on Thursday and Friday last.

Patrol Association.

A respectable meeting was held at the Court House, in Charlotte, on the 14th inst., for the purpose of forming a Southern Patrol Association.

Shipping.

The rates of shipping by Charleston from New York and New Orleans, are from 20 to 30 per cent cheaper than by any other route.

Medical Association.

The Chairman appointed a Committee of five to nominate officers for the government of the Association, who, after reading a short time, reported the names of the following persons:

Dr. A. P. Wiley of Chester, S. C., President; Dr. C. L. Hunter, of N. C., and R. A. Springs, of S. C., Vice-Presidents; W. A. Williams, of Charlotte, Recording Secretary; B. F. Arthur, of S. C., Corresponding Secretary; and Dr. P. Monckland, of Greensborough, Treasurer.

A Committee of three was appointed by the Chairman to select an Orator to address the Association at their next annual meeting.

The next meeting of the Association will be held on the third Thursday in August, 1859.

The meeting then adjourned. A more extended notice of the Association will be given in our next.

The Election.

Returns from the elections which took place this month, in New York, New Jersey, Massachusetts, Delaware, Illinois, Michigan and Wisconsin, show that the Republicans have carried everything their way.

In New York the Republicans have elected 24 and the Democrats 2 Members of Congress. There is no doubt now that there will be a Republican majority in the next House of Representatives.

The following is a comparison of the vote with the last Congress:

Table with 3 columns: Dem., Opp., Opposition. 1854: Dem. 58, Opp. 37, Opposition 193. 1858: Dem. 58, Opp. 37, Opposition 193.

Mr. D. C. Thoms, of Ireland, proposed all emigrants in the way of Europe. He stated, as he informed me on 1st of Nov. that he had some fine seeds of vegetables, one of which measured 25 inches long. Mr. T. Foster also had some fine seeds, one of which measured 25 inches long. This was considered a double one by some, although it had but one top, but two roots. Mr. T. then presented...

Mr. S. M. Westbrooks was obliged out with some 1000 of the Apple and some Pear...

Our readers will find a short story on our first page, which shows how necessary this periodical is to a family.

The North Carolina Plover has also been received. It contains an amount of useful information to the agriculturist.

Something new.

It will be seen by reference to his advertisement, that Mr. J. B. Palmer has opened a Candy Manufactory in Charlotte. This is something new in Charlotte, and we hope it may be profitable to him, as his Candy is very good, as we have had an opportunity to test it, and will be afforded on reasonable terms at wholesale.

Mr. Kaynor, of North Carolina.

The Hon. Kenneth Kaynor, of North Carolina, has written a note in a political committee at Wilmington, N. C., in which he takes strong ground against the Kansas policy of the administration, and in favor of protection to American industry, which he regards as a national and not as a Northern question.

Illinois.

In this State the Douglas Democrats seem to have been successful. It is therefore certain that Mr. Douglas will be re-elected to the U. S. Senate from Illinois.

FOR THE S. C. WHIG.

Mr. Editor: For two years past the commercial interests of our town and county have been much depressed. This has been owing to the short crops and financial embarrassments of the country generally.

It is gratifying, however, to see the greater activity and enlarged business now going on with the merchants of this place. Their sales have never been better to a better class of customers. This results from their activity in business and the natural advantages of this section of the State.

The rates of shipping by Charleston from New York and New Orleans, are from 20 to 30 per cent cheaper than by any other route. The reasons of this are obvious. In the first place Charleston is 80 miles nearer by railway to Charleston than to any Atlantic port in North Carolina. In the second place, the S. C. Railroad is the oldest and best established Road in the South. It almost without grades and curves from Charleston to Columbia, with one or two exceptions, transport 80 cars with 10,000 or 15,000 lbs. of freight in each of its trains.

Of all the routes which we have tried and compared by freight bills, Charleston is the cheapest. The freight is about 50 per cent higher by this route than by Charleston. But this is not surprising when we consider the number of miles that the freight has to pass over; and the further west that it is 115 miles further by land than to Charleston. In addition to this, while there has been more delay and expense on freight via Charleston, the same is not equal, in consequence of the severe blasting of that city from yellow fever, yet owing to the large commercial interests of Charleston, the amount of her shipping both foreign and coastwise by schooners, brigs, ships and steamers, we are enabled to get goods from New York and Philadelphia, and ship produce to those points, in about half the time it takes to receive freight by any other route. Here is another great advantage to the mercantile interests of Charlotte. These advantages of cheap freight, quick transportation, ready sales and low prices, with active merchants, have created a commercial interest and property invaluable to the farmers, mechanics and manufacturers of Western North Carolina.

Letters from Salt Lake.—The California Salt Lake mail arrived at St. Joseph on the 23rd inst. Eight passengers came in the mail to Salt Lake. Among them was Mr. Wallace, editor of the Alta California, en route for New Hampshire. Mr. Wallace speaks in high terms of the California Salt Lake mail. The weather was fine and the grass good. The Indians were numerous on the route.

The citizens of Oregon Valley are asking for a Territorial Government.

Col. Anderson, of the Sixth Infantry, with one thousand men and one hundred and fifty wagons, were met at the Alkali Springs en route for Benicia.

The mail left Salt Lake on the 23rd inst. Everything was quiet and prosperous among the Saints.

The District Court was in session, Judge Snelzer presiding. The Grand Jury is composed of wagon makers and old mountaineers.

Several more steers had arrived in the mountains and several hundred head had been lost.

HAIRYWOOD, CONN., Oct. 25.

LATE AND IMPORTANT FROM OREGON.—A letter, received from Lieut. Tyler, of the United States Army, at Oregon, to his father, dated September 15th, states that the Spokane and Palouse Indians had been defeated after two days fighting. The Spokane chief and nine hundred horses were captured, and all the plunder taken from the Spokane recovered. Skopton's point is said as the body of a dead Indian. The army lost but one man. The Indians were brought for peace and complying with demands. The war was considered ended. This letter was expressed to Fort Taylor by an Indian runner, and is probably the only news from the west of war in the Territory.

From the Washington Union.

BY JAMES BUCHANAN, President of the United States of America.

A PROCLAMATION.

Whereas information has reached me from sources which I cannot disregard, that certain persons, in violation of the neutrality laws of the United States, are making a third attempt to set on foot a military expedition within their territory against Nicaragua, a foreign State, with which they are at peace. In order to raise money for equipping and maintaining this expedition, persons connected therewith, and I have reason to believe, have issued and sold bonds and other contracts pledging the public lands of Nicaragua and the transit route through its territory as a security for their redemption and fulfillment.

The hostile design of this expedition is rendered manifest by the fact that these bonds and contracts, on behalf of the possible value to their holders, unless the present government of Nicaragua shall be overthrown by force. Besides, the very extraordinary and unauthorized plenipotentiary of that government in the United States has issued a notice, in pursuance of his instructions, dated on the 27th instant, forbidding the citizens or subjects of any nation, except passengers intending to proceed through Nicaragua over the Transit route from ocean to ocean, to enter its territory without a regular passport, signed by the proper minister or consul general of the respective country in the country from whence they shall have departed. Such persons, with this exception, will be stopped and compelled to return by the same route, and that took them to this country. From these circumstances, the inference is irresistible that persons engaged in this expedition will leave the United States with hostile purposes against Nicaragua. They cannot, under the laws which they have assumed, that they are peaceful emigrants, conceal their real intentions, and especially when they know, in advance, that their landing will be resisted, and can only be accomplished by an overpowering force. This expedition was successfully resisted in previous to the last expedition, and the result is such that this expedition is a clear violation of the laws of the United States, and a clear violation of the laws of Nicaragua. It is the duty of the United States to protect the citizens and subjects of any nation, and to prevent the citizens or subjects of any nation, from being used as a means to the overthrow of the government of a foreign State. It is the duty of the United States to protect the citizens and subjects of any nation, and to prevent the citizens or subjects of any nation, from being used as a means to the overthrow of the government of a foreign State.

AMERICANS IN MEXICO.

The following is from the Mexico correspondence of the New York Times:

Every day we are going from bad to worse, and still we have no encouragement from abroad. We, who have come here to live, have made this our home, expecting to enjoy the provisions of a series of treaties which are as binding on the honor of the Governments that made them as their Constitutions. An American in Mexico has the same right to claim when he is wronged in violation of treaties as a citizen at home has to complain when he is wronged in violation of the Constitution of his country. The moral right is the same. But we go abroad ever, more or less, lured up under the general heading of "adventurers," and although the word says we claim that we are sure of anything, not even our lives, still there are many foreign adventurers here who deserve well in any country, and the repeated outrages which have been perpetrated against them in violation of treaties, should have attracted attention long since. The number of this class is large, and many American citizens are to be found among them. And now all of us Americans, and all other nationalities, are directly outraged by this suspension of correspondence.

What is to be our next presentation remains to be seen. It was rumored, yesterday, that the house of Mr. Forsyth would be entered by force and the refugees now there taken from it. I believe there are some grounds for this belief, although I do not think it will occur. I also learn from good authority that Mr. Forsyth himself and his friends were yesterday soliciting the aid of foreigners to defend his house against invasion. I believe that arms have also been sought for this object, as well as combustible materials. It is to be hoped that nothing will come of this, for should a war be declared from the United States Legislature, I fear we shall see a bloody tragedy. No good can come from it for us foreigners in Mexico.

Really, I am at a loss to see what keeps Mr. Forsyth here. Surely ten thousand "Northerners" at Vera Cruz, and the militia, ten thousand troops so bad, are less dangerous to him than remaining here, to witness the American Government can sustain or protect him. His acts have all tended to get us into trouble since the day of his arrival. He has now ceased his diplomatic character and surrendered the archives of the Legation to the United States Consul here, and why now to try to play out the miserable role which he has taken on himself to act in Mexico? I think he deserves great censure for staying here to keep in his house men who are known to be plotting against the Government. If trouble now comes upon us from his acts, we shall have him to blame for it.

I should like to laugh at the reported invasion of Mr. Forsyth's house, but I cannot believe a majority of the Cabinet, in Council, a few days ago, would in fear of doing it, and also of sending him out of the country under escort. The Government of Mexico rely on the inability of the Government at Washington, and are, therefore, bold in taking such a step. But, in former letters, I have spoken enough of this. I have now only to ejaculate—how long it is to be before the mail course of Mexico will demand the attention of the American Government? So far, Mr. Buchanan has treated us with civility and apparent contempt.

THE FATHER OF WATERS.

The greatest of the Mississippi River is that depicted by a writer from Madison, Wis., Wisconsin.

While I look out upon the river, three miles wide at this point, my mind seems to take in at one glance the magnitude of the North. From the frozen regions of the North to the sunny South, it extends some thirty or forty miles, and with the Missouri, is forty-five hundred miles in length. It would reach from New York across the Atlantic, and extend from France to Turkey, and to the Cape of Good Hope, in average depth from its source to Lake Texoma, in Minnesota, to the delta in the Gulf of Mexico, is fifty feet, and its width half a mile.

The trapper on the Upper Mississippi can take the fur of the animals that inhabit its shores, and exchange them for tropical fruits that are gathered on the banks below. Slaves fall at one end of this great thoroughfare, while the free red men of the forest roam at the other end. The South is more than a month in traveling from its source to its delta. The total value of steamers afloat on this river and its tributaries, is more than \$100,000,000, and number as many as fifteen hundred—more than twice the steamboat tonnage of England, and equal to that of all other parts of the world. It drains an area of twelve hundred thousand square miles, which is nearly equal to the entire area of the United States, the least of which is larger than the vaunted streams of mighty Europe.

It might form natural boundaries for all Europe, and yet leave for every country a river larger than the Rhine. It could furnish more every year than the revenue of many petty kingdoms, and rolls a volume of water despite the cathedral of St. Paul which is sunk out of sight. It discharges in one year more water than has flowed from the Nile in five centuries; it swallows up fifty rivers, which have no name, each of which is longer than the Rhine. The addition of the water of the Danube would not swell it half a foot; to use a single reservoir, (Papa), twenty-five hundred miles from the sea, the basin of the world might safely rise as much. It washes the shores of twelve powerful States, and between its arms lies space for twenty millions.

THE SAGACITY OF THE BEAVER.—Words that should be engraved on Gold.—Judge Patten, of Pennsylvania, resigned his seat on the bench some days ago, and in his last, takes occasion to utter the following sentiment, which should be passed over the door and justified in the heart of every patriot of the land. He says:

"I was not so thoroughly convinced, by reading and reflection, that who ever a judge can be elected by reason of his wealth, means no very question of politics, that I would not have signed the certificate of his election. It is a very erroneous doctrine, very inexplicably expressed, but I shall maintain it, while I possess a moral sense, or retain a rational faculty."

THE BRITISH GOVERNMENT AND FRANKLIN.

—We copy the following from the Baltimore Sun:

The British Government has given formal notice to the United States Government that they will interfere to prevent any further filibustering expeditions from the United States upon Nicaragua, Costa Rica or any of the Central American States. This is an empty declaration, but a positive and grave determination. In enforcing it, the British Government are about to send a strong bolt to the part of Greytown, and also to San Juan del Sur.

It is probable that some enterprises, of a character similar to that imputed to Gen. Walker, are in progress in regard to Nicaragua. Some mysterious movements from New York in the direction of Nicaragua can only be accounted for on this supposition; and hence the interference of Great Britain at this time.

THE GRAVE OF FRANKLIN.—This morning, the fence around the opening lately made in the wall of Christ Church grave-yard, at Fifth and Arch streets, for the purpose of expanding to view the grave of Franklin, was taken down, and thousands have availed themselves of the opportunity of gazing at the modest stone which covers the remains of "Benjamin and Deborah Franklin." The railing and other fixtures in the square made in the old wall, present a very neat appearance, and the tomb in its immediate vicinity can be seen distinctly. The grave of the great printer can now be seen from the street, and the view is very interesting. From present indications the expense of erecting the structure in the wall will require twenty-five thousand dollars. It is to be hoped that the opportunity of gazing at the modest stone which covers the remains of "Benjamin and Deborah Franklin." The railing and other fixtures in the square made in the old wall, present a very neat appearance, and the tomb in its immediate vicinity can be seen distinctly. The grave of the great printer can now be seen from the street, and the view is very interesting. From present indications the expense of erecting the structure in the wall will require twenty-five thousand dollars. It is to be hoped that the opportunity of gazing at the modest stone which covers the remains of "Benjamin and Deborah Franklin."
