THE BUNKER HILL CENTEN. NIAL.

The many Centennials of the present year, it would seem are doing a vast late Legislature calling a Convention deal of good Aside from the revivabol of the people of the State. For conven- of the grandest and best feelings of our ient reference we shall keep it standing nature by them, they are bringing toeach other, the people of the North and seems to be dawning upon the whole land. It is in many respects like the reconcilliation of estranged brethren, who discover that each has permitted himself to misunderstand, and wrongfully accuse the other. This is a glorious sight to all but designing politicians; to them it is sad, for in it they see the downfall of their selfish projects and purposes. The politicians, of evil design have kept the people by the ears for a long time, while they have profited by the strife they actively produced. Our Centennial, alone, has been the subject of reflection, and our people, alone, have been charged with other than pure patriotic motives, but these groundless and slanderous charges were only made by a few, very few, of the most violent and partizan of republican papers, and are already forgotten. Their authors must suffer in the feeling of a small shame, that is incident to the attempt to do a small ignoble action at the promptings of impotent spite, and be caught in it, and permitted to pass almost unnoticed, because of the very insignificance of their poor attempt. Southern men went to Massachusetts, and were welcomed there, and throughout the North where they went. Here is the speech of General Fitz Hugh Lee. who won his title, and his fame by fighting for the Confederacy, to the Mayor of Boston, delivered in Boston.

"Mr. Mayor, I have but a few words o say. I came here not expecting to speak, and I think we have had enough speeches and fully understand every thing, but I unite with these gentlemen in thanking you and in thanking the city of Boston and its vicinity, through you, for the very cordial and gratifying reception which we have met here. We expected to be the recipients of some little civility at the hands of the gentlemen of Boston, even these who differed description, including most widely with us, but we were not prepared to meet with the enthusiastic and splendid demonstration which we have witnessed at your hands. We will return to Virginia, and we will tell those people that they should come here langing in price from \$25.00, to \$500.00; and see for themselves, as we have seen office, Dining-Room, Parlor and Rockthe people of Boston, and they will."

Not as we desire to excite our lady friends with pangs of envy, covetous ness, or any thing of the sort, but it may as well be stated right here that there is,nt any use of trying to rival a piece ot femiuine apparel found last week in the trunk of a New York city Dutchman. It is a dress, "a marvel of beauty," made entirely of Pointed Alecon lace weighs one half a pound, can be slipped through a wedding ring, and is appraised at \$10,000 in gold, foreign value. It took ten women seven years to weave it; and the room in which they worked was kept constantly dampened-lest it should "dry up and and blow away," we suppose. It was der term of office now existing and filled or held signed for the Empress Eugenie, but was never worn by her-being rather thin for one of her robust stature. After the France Prussian war it was returned to Brussels, and fell into the hands of the Dutchman, who tried to sell it to some of Queen Victoria's court-maidens. His next move was to smuggle it in to S. this country, to dispose of it to some Yankee shoddycrat, ot more money than brains who would pay the fabulous price because it had once lain in an Empress, ward-robe. But a Government detec tive heard of the smuggled garment, and seized it for the violation of law. There were also captured a shawl valued at \$1,000; handkerchief, valued at \$500; and collars at \$500 per pair.

A machine for writing spoken words has been invented by Mrs. M. H. Huppinger. The Review Industrielle describes the machine as being about the size of the hand. It is put in connec tion with the vocal organs, the instrument recording their movements upon a moving band of paper in dots and dashes. The person to whom the in strument is attached simply repeats the words of the speaker inaudibly. This lip language is then faithfully written
