THE HORSESHOE NAIL. "Murder, though it hath no tongue, speaks

On the evening of June 20, 1887, a ped ller on horseback stopped at the smithy of one John Steele, on the outskirts of the town of Tickhill, near Doncaster, Eugland. Several persons were in the smithy at the time, besides the blacksmith and his son Richard. The peddler asked Steele to shoe his horse as quickly as he could, as he wished to reach Don easter early, and get to bed at his old place; for next day being "Statnes," or fair, a number of visitors would be look-

ing for accommodation. While the smith was attending to the peddler's horse, another stranger arrived,

and he saw a face looking down upon him. He hay quite still, though greatly alarmed. The face disappeared, and re-treating steps were heard. He arose on his elbow and peered through the curs. put out. Next morning neither the peddler nor his friend appeared, and the landlord went to the outbaildings to aronse them. He found the door open, and on entering the room discovered the pedder in his shirt, lying on the floor at the far end in a pool of blood. His head was battered in, and near him was lying a hammer with blood and hair on the head. He was

dead and cold. When the alarm was given it was found that the man who had accompanied the peddler and occupied the same room with him was missing, and suspicion at once fell on him as the murderer. The authorities were notified, and officers were in pursuit of the supposed assassin before the day was an hour elder. They tracked him to Commbro, but lost trace of him just outside of that town, on the road to Sheffield. The keen eyes of the officers however caught sight of a horse among the brambless, in the valley to the left of the road, and there the man was captured. He was terribly trightened—so much so as to be unable to ar-ticulate for some time. Strapped to his saddle bow was a valise, and on opening it a heavily filled wallet, identified as the

peddler's, was found. Before the coroner the prisoner. who said that his name was Henry Scott, told a most astonishing story. He said that when he went to the outhouse the peddler had already gone to his bed, which was a high, old fashioned tent bed, with curtains. Scott took a bed at the end of the room. This bed had curtains also, as the room was large and draughty. He placed his clothes on a chair and flung

'Anything like that nail?' Mr. O'Brien repeated, calmiy , looking at the witness.

'Yes, sir,' Steele replied at length, with difficulty.

'Should you say that nail had been his valise, or holsters, on a bit of carpet made in Holderness, Mr. Steel?"
