H Poem for Today

OLD IRONSIDES

By Oliver Wendell Holmes

E, tear her tattered ensign down! Long has it waved on high, And many an eye has danced to see That banner in the sky; Beneath it rung the battle shout, And burst the cannon's roar; The meteor of the ocean air Shall sweep the clouds no more.

Her deck, once red with heroes' blood, Where knelt the vanquished foe, When winds were hurrying o'er the flood, And waves were white below, No more shall feel the victor's tread, Or know the conquered knee; The harples of the shore shall pluck

Oh, better that her shattered hulk Should sink beneath the wave; Her thunders shook the mighty deep, And there should be her grave; Nail to the mast her holy flag, Set every threadbare sail, And give her to the god of storms, The lightning and the gale!

THE ANDORRANS.

All the inhabitants of the Little public Are Related:

multants of Andorra, the little republic which is wedged in between France and Spain and which has exist-ed since the year 752, are very proud of their blue blood and ancient lineage. In their eyes a gayache (foreigner) of ly an inferior being, a sort of much room upstart in comparison with them selves. During 1,200 years they have continually married and intermarried to such an extent that at present all the inhabitants are practically cousing yet, strange to say, neither their physi cal; mental nor moral qualities seem to have suffered. Both sexes are strong limbed, broad shouldered, bright eyed hardy and long lived, retaining their hair and their teeth to a green old age They are also keen witted and intelligent, alert and happy hearted, sober industrious, hospitable and devout. The feminine Andorran has not a vest ige of coquetry about her. She is just the female pure and simple. She is a thirfty housewife, a helpmate to her husband in the most literal sense of the term—ready and able to trudge off across mountain and valley beside him with a pack of amuggled goods on her back in case of need.—Wide World

PROMOTED THE COOK.

An Error Made Him a Professor History In Russia.

Some years ago the minister of education in St. Petersburg was appealed to by telegraph for a cook, to be hurdashes and dots mix but by next train a man arrived and was ceremonionsly conducted to the university, where he was introduced to the assem-bled faculty and students as the new

professor in Mutery. The unhappy fellow protested that, while he might be a professor of pots and pans, he knew nothing about history. But in Russian official life it is harder for to correct an error than to naka one, so for several years the cook has held his professorship, though no one attends his lectures.

Another laughable story comes from the Suwalky school for boys. A doorteeper there who could scarcely read or write had grown so untidy and allow that he was no longer useful, but as the headmaster did not want to set him adrift he promoted him to a teach-ar's post and had him transferred to a distant school. He, too, will be a prolessor some day.-Moscow Letter in New York World.

Didn't Want It Flattened.

This story is told of Jerome K. Jerome, the humorist. Returning from abroad one time, he fell into good company, with the exception of one man, who was what is known as "a walking encyclopedia." This men persisted in giving all sorts of information, much to the annoyance of Mr. Jerome and others. One morning, as the travelers leaned over the rail, admiring the ris-ing sun, the man with the information turned to them and said almost solmenly:

tlemen, if the earth were flat tened out the sea would be two mile deep over the whole world."

Mr. Jerome turned around, seeming by stunned. Then he grow indignant and, walking over to the other man he said, shaking his finger menacingly. "Look here, man, if you catch any fellow trying to finiten out the earth-shoot him on the spot. I can't swim." Philadelphia Times.

Landon's Town Hall. suiding in London, which may be the ce of assembly of several courts, as and a police court presided over by one of the aldermen. The construction of the building was began in 1411. It was partially destroyed in the green fire of 1666, but was soon restored, and in 1780 it was attered to its present form. The hell proper is 150 feet in-length, 48 in breadth and 55 in height. It has been fanceus for conjuntes for the magnificance of its stric feasts. ce of its cirie fee first time it was used for this

"What are the 'middle agen?"
"Why, the middle ages, my boy, are they stop counting."-Yonkers States

He Got Badly Left. Experiences of a correspondent of Nuremberg paper go to show that the German adulteration laws are drastic. He says: "A French friend sent me four bottles of burgundy. After pay ing the duty I was informed that all wine coming from abroad has to be analyzed. As my consignment includ ed two kinds of wine a double analysis was necessary, and for this I paid a fee of \$9.24. As the end of a week I received first a certificate attesting that my wine was pure and, second, the case in which the bottles were sent. was also informed that two bottles had been required to form the basis of each analysis and that consequently there was no wine left. I am naturally grateful to the state for the precau fions taken to guard my health, but cannot belo thinking I am entitled to the empty bottles. Surely these were not also analyzed."

Got His Receipt. He had rus up a small bill at the village store and went to pay it, first asking for a receipt. The proprietor grumbled and complained it was too small to give a receipt for. It would do just as well, he said, to cross the account off and so drew a diagonal

pencil line across the book. "Does that settle it?" asked the cus

"An' ye'll niver be askin' for it ag'in?" "Certainly not."

"Faith, thin," said the other coolle an' I'll kane me money in me pocket "But I can rub that out," said the storekeeper.

"I thought so," said the customer dryly. "Maybe ye'll be givin' me a reeint now. Here's yer money

"That is all, Mr. Skybo; you may stand aside."-Chicago Tribune.

Angling and Fishing.
The true angler does not care in about the sise of the catch, and let it embered that to angle and to eatch fish are very different things There are debased creatures in human guise who will attach an assortmen of murderous hardware to the end of a rope and with it pull fish from the water by sheer strength, but rich methods are unaccognised by the anglet who has imposed upon himself a rigid code of honor and to whom oven the use of live balt as a last resort is the occasion for severe self forth to catch fish, but to fish, and easy those with the angier's nice sense of propriety will recognize the dif-ference.—Philadelphia Times.

bore or caliber, just as motorcar en-gine cylinders are. A 12 inch gun, therefore, is a gun that fires a shot which is twelve inches in diameter. The length of a gun is reckoned to callbers. For instance, a 50 callber 12 inch gun is one fifty times the length of its bore—that is to say, fifty feet king. A 30 caliber six inch gun would be twenty-five feet long, and so on.— London Standard.

heaven. When Thomas Dudley, father of the first American poetess, Anne Bradstreet, came to his deathbed, says the South Atlantic Quarterly, he showed where his daughter had received her surprising gift by composing such fare

well lines as: Dim eyes, deaf ears, cold stomach shew My dissolution is in view.

Eleven times seven near lived have I.

And now God calls I willing die.

Bacon and the Fishers. In "Aubrey's Lives" this quaint story is told of Lord Bacon: "His lordship, being in the garden looking on fishers as they were throwing their nets, asked them what they would take for their catch. They answered so much. His lordship would offer them not so much. They drew up their net, and in it were only two or three little fishes. He then told them it had been better for them to have taken his offer. They replied they hoped for a better draft, but, said his lordship, 'Hope is a good breakfast, but an ill supper.' "

A Japanese Wedding. A Japanese wedding is a quaintig pretty ceremony. The bride, dressed in a white slik kimono and white veil, sits on the floor facing her affianced husband. Near them are two tables upon one of which are two cups, a bottle of sake and a kettle with two spouts. On the other are a miniature plam tree, typifying the beauty of the bride; a miniature fir tree, represening the strength of the bridegroom and a stork stands on a tortoise, sig-nifying long life and felicity. The bride and bridegroom drink alternately from the two spouted kettle in token that they will henceforth share each other's joys and sorrows. After the wedding the bride's veil is laid away to be used as her shroud.

A Bird's Barbed Wire Fences. There may be seen along the roadsides in Central America a brown wren about the size of a canary which builds a nest out of all proportion to its apparent needs. It selects a small tres with horizontal branches growing close together. Across two of the branches it lays sticks fastened together with tough fiber until a platform about six feet long by two feet wide has been constructed. On the end of this platform nearest the tree trunk it then builds a buge, dome shaped nest a foot or so bigh with thick sides of interwoven thorns. A covered passageway is then made from the rest to the end of the platform in as crooked a manner as possible. Across the outer end as well as at short intervals along the inside of this tunnel are placed cunning little fences of thorns with just space enough for the owners to pass through. On going out this opening is closed by the owner by placing thorns across the gateway, and thus the safety of the eggs or young is assured. Harper's Weekly.

Finding Mark Twain by Faith. One evening a few years ago Brander Matthews and Francis Wilson were dining together at the Players club of New York, when the former made the suggestion that they write a letter to Mark Twain. "But," objected Mr. Wilson, "we don't know where he is," for it was at a time when Mr. Clemens was away traveling somewhere. "Oh," said Professor Matthews, "that does not make any difference. It is sure to find him. I think he is some place in Europe, so we had better put on a five cent stamp." So the two sat down and composed a letter, which they addressed to "Mark Twain, God Knows

Within three weeks they received a reply from Mr. Clemens which said briefly, "He did." The letter had been sent by the New York postoffice to Harper & Bros., thence to Chatto & Windus of London, thence to a bank in Vienna and from the bank to the small town in Austria in which Mark Twain happened to be staying .- Book-

The Storage Battery.
The correct technical term for the fluid in a storage battery, which is often called acid, is electrolyte. This fluid is a mixture of four and a half parts by volume of distilled water to one part of pure concentrated sulphurie seid. Should it become necessary to replace it on account of loss by spilling or leakage the strength above in dicated should be used, but evaporation loss should be made up with a more dilute acid, consisting of ten parts of water to one of pure concen trated sulphuric acid.

A CURIOUS REPUBLIC.

Oddities of the State of the Valleys of

Wedged in like a debatable land between France and Spain lies a quaint little state which calls itself the "Republic of the Valleys of Andorra" and dates its foundation from the year 782, when Charlemagne gave its people a charter of independence as a reward for the aid they had given him in his struggle to drive out the Saracens from charter, one of their most precious possessions, is still preserved in a curious iron armory with six locks which stands in the house of parliament at Andorrs le Villa, the metropolis of this miniature state.

changeful history of Europe Charlenagne's charter has been confirmed y various monarchs. Even Napooen, ruthless destroyer though he as "une curiosite publique." It certainly is a public curiosity, patri-archal and primitive to an almost modern Europe. Anderra has no written history, no written laws. Everything is done according to traditions handed down from generation to generation, and the form of government and the manners and customs of the people are essentially the same today as they were 1,200 years ago.
The fact of the republic's isolat-

ed position contributes as much asanything to this curious state of affairs. The Andorrans are almost as conservative as the Chinese They mistrust foreigners and for eign inventions and have a rooted objection to such things as photographic cameras, railways, telegraph wires, telephones and other mo-dernities, which, to their minds, savor only of Sodom and Gomorrah and that wicked world whose faroff echoes occasionally reach their ears and shock their sensibilities: Nature has provided them with impregnable fortifications in the shape Pyrenean masses that shut them in completely and securely on every hand, and they have no mind to al low their peaceful harmony to be disturbed. Let other nations quarrel and fight with each other if they choose. Andorra has no am-

She never has had any. The con-fines of the country today are just exactly the same as they were in the year 782, neither more nor less. She is very tenscious of her independence, of her antique traditions, of her manners and customs, but she is content to remain what she the midst of modern Europe, managing her own little affairs as she chooses and leaving her neighbors to do the same with theirs. To get into or out of Andorra on any side you must cross an elevated mountain pass, and there is not a single highway leading into the country either from France or Spain. The principal entrance from the French side is the pass of Solden, nearly 8,000 feet above sea level. This is the only one practicable for horses. The others are mere mule tracks or footpaths, and all of them are blocked during the snowy season.— Wide World Magazine.

It was Darwin's gardener who, when a friend of the family inquired after the health of the far naturalist, who had been somewhat ailing, replied confidentially that he did not doubt his master would be better "if he could find something to do." The patient and minute re-search in which he daily saw Dar-win engaged struck his mind as merely a foolish and fussy form of

The gardener of Professor Huxley, with equal unconsciousness of doing so, also cast a slur upon his renowned employer. Mrs. Huxley, fearful that he might be overworked, had inquired if he did not need some assistance.
