GOOD LAWN BEAUTIFIER.

Its Foundation is Only an Old Umbrella Frame, but it's Most Artistic. One does not need the services of an expensive landscape gardener to make one's lawn a thing of beauty. Of course, thick, well rolled and well cropped turf is the prime necessity, but there is always needed some bit of color to accentuate the eye resting beauty of the long sweep of green.

Here is the way one ingenious woman secured a centerpiece for her award, according to Popular Mechanics: "She dug up an old umbrella from the attic, cut away the faded silk cover-

ing, ran a piece of thin wire through the top of each rib, taking a turn around each eye, so as to keep the ribs apart at regular intervals, and then sunk the handle deep into the ground in a small circle cut out of the sod in the middle of the lawn.

Then she planted some sweet peas in a variety of colors, and now she has a Joseph's coat mound of color that is an absolute delight. And, obeying the old adage, "the more sweet peas you pick the more you'll have," she fills her vases all through the house with all the time.

THE VALUABLE TURNIP.

Worth Growing if Only For Its Effect on Dairy Cows.

While the real food value of turnips is considered somewhat low, they are wonderful appetizers, especially for dairy cows, not only toning up their systems, but increasing the flow of milk.

Then there are several tempting dishes for the table that can be formed from turnips, and by storing a good supply of them for winter their use will save considerable of the higher priced products, both around the feed stalls and table.

Turnips for winter storage should not be sown till in July, from the 10th to the 20th, or even a few days later will not be too late. Where they are sown earlier than this, the hot weather causes them to become stringy and pithy, but if sown as above stated they mature when the weather is cooler, which greatly enhances their flavor, gives them a firm, solid flesh and adds to their keeping qualities.

A rich, sandy loam or fresh soil is best adapted to turnip raising, and they may be sown either broadcast or drilled. If sown broadcast it may be done just before a shower, and there will then be no necessity for covering the seed, as the raindrops will do the work better, a light covering being put on that is required. If the seeds are drilled one can arrange so the plants may be cultivated by hand, the rows being placed about eighteen inches apart. Put in plenty of seed at the time of drilling and thin out the plants when they come up, till they are from three to four inches apart, thus giving them ample room to grow.—Homestead.

Rape Seed For Hogs.

If a little rape seed is sprinkled with the dry variety of feed, it will be provided and the hogs will do even better than upon dry alone.

Brief Suggestions.

Go over the orchard and see that all the wounds are well painted.

The golden wax bean is a favorite with many garden makers. It is tender, of good quality and stringless.

If a small pig is chilled it can be revived by dipping it in water as hot as you can bear your hand in, then wrapping it in warm flannel.

Don't keep your horse in an overheated stable and then stand him for hours in a freezing atmosphere and wonder how he became paralyzed.

The durability of the mule is a strong point in his favor. He lives and works to a good old age. His "sense" of self protection is strong, and he avoids many injuries.

Never get the idea in your head that drugs and health are inseparable, for in most cases it will be found that what we keep out of the pig's stomach has more to do with its health than what we put in.

Blackberries are very prolific and ripen at the time they can be economically gathered and marketed. They are seldom injured by late frosts and for this reason are surer than some other berries that ripen earlier.

The wheel hoe is great labor saver. A plow attachment is very convenient for opening furrows and to cover the larger seeds, as peas, beans and sweet corn. Some of the combination wheel tools with drills, cultivating teeth, plows and rakes are very satisfactory.

John Adams.

John Adams lived the longest of all the presidents, having died in his ninety-first year, while the shortest lived was Garfield, whose demise occurred when his age was forty-nine years and ten months.

In New Orleans Wednesday Edgar H. Farrar, a prominent young lawyer, was shot and killed by two men whom he chased on the idea that they had robbed his home the day before. The men were captured and confessed that they had robbed Farrar's home. On the same day in New Orleans a negro armed to the teeth ran amuck, shot two policemen who are expected to die and injured three citizens. The negro was killed.

—Ambitious young men and ladies should learn telegraphy, for, since the new 8-hour law became effective there is a shortage of many thousand telegraphers. Positions pay from \$50 to \$70 a month to beginners. The Telegraph Institute of Columbia, S. C. and five other cities is operated under supervision of R. R. Officials and all students are placed when qualified. Write them for particulars.

Six masked men held up a west-bound Rock Island passenger train midway between Memphis and Hurlburt, Ark., early Wednesday morning, ransacked mail pouches, fired seven nitro-glycerine caps into the "way" safe of the express car, which not only tore away the safe doors but wrecked the car, and in the midst of their work were frightened away when a switch engine, searching for the overdue train, approached from Hurlburt. It is said the robbers secured little of value.

The Tribune says a cow broke into a flower garden in Concord the other day and scorning all else in the enclosure proceeded to destroy a bed of magnificent chrysanthemums which the lady of the house was nurturing for a flower show. We don't know what the lady said, but we have an idea how a man would have expressed himself. Then he would probably have killed the cow.—Landmark.

FOLEY'S KIDNEY PILLS

New Mexico's First State Election to be Held Next Tuesday.

Santa Fe, N. M., Nov. 4.—Tuesday next New Mexico will hold its first State election for Congressmen, Governor and State officers, judiciary and a legislature that will have the choosing of the two United States Senators. The Republican ticket is headed by H. O. Bursum as candidate for Governor. For Congressmen the party nominees are former Governor George Carry and Ellego Baca, of Albuquerque. The Democratic candidate for Governor is W. C. Litter, of Albuquerque, and William McGill, of La Lande. The territory of New Mexico was Republican for more than ten years, but in the last four the majority has been steadily cut down, which has given the Democrats strong hope of victory, especially on the Congressional and State ticket. The legislature apportionment by the Constitutional convention, controlled by Republicans, is expected to ensure the election of a Republican legislature and the choice of two Republicans as United States Senators.

Saved Many From Death.

W. L. Mook, of Mock, Ark., believes he has saved many lives in his 25 years of experience in the drug business. "What I always like to do," he writes, "is to recommend Dr. King's New Discovery for weak, sore lungs, hard colds, hoarseness, obstinate coughs, la grippe, croup, asthma or other bronchial affection, for I feel sure that a number of my neighbors are alive and well today because they took my advice to use it. I honestly believe it is the best throat and lung medicine that's made." Easy to prove he's right. Get a trial bottle free, or regular 50c or \$1.00 bottle. Guaranteed by Graham Drug Co.

Perhaps the quickest time in which a capital case was ever disposed of in North Carolina was at Bryson City when Ross French, a Cherokee Indian, charged with the brutal murder of little Miss Ethel Shuler, a 14-year-old girl of the mountains, was tried, convicted and sentenced to electrocution in less than one-half day's session. November 24th was set as the date of electrocution.

Balked At Cold Steel.

"I wouldn't let a doctor cut my foot off," said H. D. Ely, Bantam, Ohio, "although a horrible ulcer had been the plague of my life for four years. FOLE MILLION DOLLARS OF OTHERS' MONEY IN PRIVATE BANK.

Morgan Holds Strong Grip and Controls Industrial and Financial Situation of the Country.

Washington, D. C., Nov. 1.—The New York financial newspapers, all of which are Wall Street organs, are still complaining about the activity of the Democratic investigating committees. They profess to believe that these investigations are being carried on solely for what they call the process of making "political thunders" for the approaching campaign. These newspapers regard every move which threatens to disturb the Wall street barons while they are engaged in their present operation of coupon clipping, as little short of treason.

In the meantime information has been coming to light lately, largely as an incidental result of the Stanley Steel Committee's work, showing the details of J. P. Morgan's grip on the industrial and financial situation in this country. This information shows up the tremendous power wielded by this one man in such a manner that the democrat in Congress see more clearly than ever that their program will be vindicated if it accomplishes no other purpose than to demonstrate how completely a single individual holds it in his power to say whether business shall be good or bad; whether the times shall be those of panic or prosperity.

J. P. Morgan controls more than half a billion dollars of other people's money, and he has it in his power to do with this tremendous sum as sees fit. Not only does he hold the cash but he holds it in such a way that its trusteeship gives him control of practically all of the big railroads and industrial corporations. This one man has it in his power to regulate, by the wave of his hand, or the nod of his head, the course of tremendous enterprises on which millions of people depend for a living.

The Stanley committee brought to light the fact that the entire cash balance of the steel corporation, amounting to upwards of seventy-five millions of dollars, was on deposit in the office of J. P. Morgan & Co., a private banking concern, not subject to the supervision of nation or State, or any other constitutional authority.

It was also discovered that the railroads which Morgan dominates also keep their balances on deposit in the Morgan personally conducted bank. The total of these cash balances run well up toward the half billion mark.

This money Morgan can lend to whom he likes, and he can refuse to lend to whom he likes. Moreover, the control of this wealth gives him the power to dictate to other bankers in the matter of designating where their money is to be loaned. If Morgan does not desire one man, or group of men, to get a hold of money with which to develop an enterprise, he can prevent the money from being loaned, regardless of how good the security may be, or how worthy the enterprise.

Thus the destiny of the nation rests on the whim of one man, and because the Democratic leaders see neither safety nor necessity in this arrangement, they propose to bring about its abolition.

This policy has aroused a storm of protest from the financial journalists who gather up the crumbs that fall from Morgan's table.
