Whites Increase Faster Than Colored Race.

That the negro population of the United States is increasing less rapidly than it did in previous decades and much less rapidly than the white race is shown by census figures published last week. In continental United States in 1910 there were 81,732, the total population; 9,828,294 negroes, 10.7 per cent, and 411,-285 Indians, Chinese, Japanese etc., 0.04 per cent. In 1880 the negroes constituted 13.1 per cent. of the population.

The white rate of increase of course, includes immigration. When the 5,000,000 white persons who entered the United States are deducted from the increase from 1900 to 1910 the rate of increase drops to 15 per cent. Accordingly, the white race's natural increase is about 4 per cent. greater than that of the negro. The natural increase of the whites for the decade 1890-1900, exclusive of immigration, was slightly more than 16 per cent.

During the decade 1900-1910 for wife murder, the whites increased 14,923,491, or 22.3 per cent. The negroes increased 994,300, or 11.3 per cent. In the previous decade, 1899-1900 the white rate of incresse was 21.2 per cent. and the negro 18.1 per

Of the total population of the South in 1910 the whites constituted 69.9 per cent, and the negroes 29.8 per cent., as compared with 67.4 and 32.3 per cent. pestively, in 1900, and with 63.9 and 36 per cent., respectively, in
