

HUSBAND RESCUED DESPAIRING WIFE

After Four Years of Discouraging Conditions, Mrs. Bullock Came to Rescuer.

Patron, Ky.—In an interesting letter from this place, Mrs. Bettie Bullock writes as follows: "I suffered for four years, with womanly troubles, and during this time, I could only sit up for a little while, and could not walk anywhere at all. At times, I would have severe pains in my left side.

The doctor was called in, and his treatment relieved me for a while, but I was soon confined to my bed again. After that, nothing seemed to do me any good.

I had gotten so weak I could not stand, and I gave up in despair. At last, my husband got me a bottle of Cardui, the woman's tonic, and I commenced taking it. From the very first dose, I could tell it was helping me. I can now walk two miles without tiring me, and am doing all my work. If you are all run down from womanly troubles, don't give up in despair. Try Cardui, the woman's tonic. It has helped more than a million women, in its 50 years of continuous success, and should surely help you, too. Your druggist has sold Cardui for years. He knows what it will do. Ask him. He will recommend it. Begin taking Cardui today.

Write to: Chattanooga Medicine Co., Ladies' Department, 125 North Second St., Chattanooga, Tenn. For full particulars on your case and 64-page book, "Home Treatment for Women," sent in plain wrapper, 1-10c.

Popular Talks on Law

THE TEACHER'S AUTHORITY.

By Walter K. Tower, A. B., J. D., of the Michigan Bar.

Every child who goes to school, and every parent who has a child in school is interested in the extent to which a teacher may control the conduct of the pupils both in and out of school. It is well settled that within the school room the authority of the teacher is supreme. In the understanding of the law the teacher has been delegated the parent's authority to exercise while the child is within his care.

The teacher has the right to maintain discipline and enforce proper rules. In doing this, the teacher may resort to physical punishment under forbidden by statute, as in New Jersey, or by the rules of his superiors. But the punishment which the teacher may administer must be reasonable, and if it amounts to unreasonable and unnecessary violence, the teacher is liable to the injured pupil in an action for assault and battery.

While the pupil is within the authority of the teacher is complete, and in all ordinary cases exclusive. The irate parent may not interfere between teacher and pupil so long as the latter is in the school. The question frequently arises as to the authority of the teacher while the pupil is either on the way to school or on his way home from school. Generally speaking, both teacher and parent have authority over the child during this period, the teacher's authority being considered necessary for the maintenance of school discipline. Not all states, however, recognize this rule. For instance, New York takes the position that the teacher's authority does not extend beyond the school building and grounds. The majority of the states, however, follow the general rule stated above, and in not a few states as California, Pennsylvania, Washington, Virginia, New Jersey, etc., the teacher is given this authority by state law.

USE OF GALOMEL PRACTICALLY STOPPED

Dangerous Drug Giving Way for Safer, More Reliable Remedy.

Hundreds of people in this vicinity alone have stopped the use of galomel when their liver is acting slowly and take Dodson's Liver Tonic instead. Dodson's Liver Tonic is always safe and has none of the bad effects which so often follow the use of calomel. It is a pleasant tasting vegetable liquid that starts the liver gently and surely, and relieves constipation and biliousness and causes no restriction of habit or diet. Many preparations have sprung up that imitate the claims made for Dodson's Liver Tonic, but remember Dodson's Liver Tonic is the tried and tested remedy that has proven such a good medicine and is so satisfactory to every user. It is the reason these imitations are on the market. Dodson's Liver Tonic cannot hurt anyone, and if it fails to do all that is claimed for it Graham Drug Company, who sell it, will give your money back with a smile.

More Cotton Ginned to October 18, than Last Year.

The third cotton ginning report of the season, compiled from reports of the census bureau correspondents and agents throughout the cotton belt and issued Saturday, shows that 6,956,583 bales of cotton, counting round as half bales, of the growth of 1913 had been ginned prior to October 18. This includes the results of the most active period of the ginning season, September 23 to October 18. During which in recent years more than one-fourth of the entire crop passed through the ginner's hands. To October 18 last year 6,873,306 bales, or 81.9 per cent, of the entire crop had been ginned; in 1911 to that date 7,558,021 bales, or 49.9 per cent, had been ginned; in 1908 to that date 6,386,156 bales, or 48.1 per cent, of the entire crop had been ginned; and in 1906 to that date 4,821,821 bales, or 38.9 per cent, of the entire crop had been ginned. In North Carolina the total ginned this year is 229,853 against 356,222 last year; 438,265 in 1911, 376,222 in 1909 and 225,077 in 1908.

FARM COUNTRY

STAPLE FOOD FOR POULTRY

Grain Will Be Used as Long as Fowls Are Kept on Farms—New Must Have Certain Varieties.

Grain is the staple food for poultry, will be used for that purpose as long as fowls are kept on farms; but hens cannot give good results on grain alone. It is beneficial to them, and will be at all times relished, but the demands of the hen are such as to call for a variety. In the shells of eggs, as well as their composition, are several forms of mineral matter and vitamins which can only be partially obtained from grain.

Even though grains carry in composition for a long time, hens will be given to refuse it, as they may be over-supplied from other sources. For this reason they will accept a change of food which is of itself evidence that the best results for his hens can only be obtained from a variety of food. Corn and wheat may be used as food with advantage, but must be given as a portion of the ration only, and not made exclusive articles of diet. In grain the principal articles of diet are required to keep a hen in good laying condition are found, and it is for this reason that your hens may continue to lay for some time if only given grain, provided they find the other elements necessary while running around the farm. But the trouble with this manner of feeding is that it is too uncertain. You are taking the chance of the hen finding the other elements required. No hen has ever laid an egg unless she has taken into her system elements from the vegetable, animal and mineral kingdoms. Grain can represent the vegetable kingdom, bugs or insects, the animal, and grit or oyster shell, the mineral. It is absolutely necessary that every hen partake of these elements before she can produce a single egg.

HOPPER FOR LITTLE CHICKS

Device Illustrated May Be Enlarged and Used for Older Stock—Construction is Simple.

The hopper illustrated below will hold one bushel of feed, and is intended for growing chicks, though by enlarging the size it may be used for older stock.

Dry Mash Hopper.

or stock. It is well, however, to keep the dimensions of the feed opening the same, this opening being specially designed to prevent waste. The ends are made of one-inch material, and the rest of the hopper of half-inch stuff. Any lumber that is at hand may be used, and the construction is so simple that anyone able to use a hammer and saw can knock one together in a very short time.

FATTEN CHICKENS FOR TABLE

Fowls Should Be Placed in Portable Pen Without Crowding—Feed Sparingly for Three Days.

Prepare a portable pen by nailing strips of lumber together to form a frame, and then tacking on pieces horizontally, so as to make an enclosure, leaving sufficient opening to give light and ventilation. The pen, which is a Virginia pen in the fatter, should be covered, and sufficient outlet left for the droppings. A roof should be made, and without leaks. The whole should be made large enough for ample accommodations, depending upon the number of birds to be kept in. Only fowls that are possible should be kept together. Do not overfeed at first; after two or three days give all that they will eat up clean, and be sure to give water after they have finished eating. Give buttermilk occasionally, as most fowls like it. Sprinkle sand, gravel or charcoal in the pen occasionally, in from one to two weeks fowls should be in good condition for eating. If there is anything wrong with them.

Declare War on Colds.

A crusade of education, which aims that common colds may be gone uncommon within the next generation, has been begun by prominent New York physicians. Here is a list of the "don'ts" which the doctors say will prevent the annual visitation of the cold. "Don't sit in a draughty car." "Don't sleep in hot rooms." "Don't avoid the fresh air." "Don't stuff yourself at meal times. Overeating reduces your resistance." To which we would add—when you take a cold get rid of it as quickly as possible. To accomplish that you will find Chamberlain's Cough Remedy most excellent. Sold by all dealers. adv.

Advertising Galks

MERCHANTS LEARNED ADVERTISING VALUE

Department Store Proprietors Finally Convinced That Newspaper Publicity Paid.

There are some merchants and business men who do not believe that advertising pays. There are others who believe that they can get along without advertising better than the best advertising mediums—the newspapers—can get along without their patronage.

These men are men without business imagination. They cannot read at a glance the worth of advertising to them, or to any business man, but have to spell out in experience, morning by morning, day by day, its real worth. Some of them never learn until too late. The author of "Galks" has written a rather remarkable book, called "Galks." One of the most incidental passages in his book is a little discussion of how certain merchants learned the value of advertising. It is interesting and instructive. "Not long ago a few advertisers in a big American city wanted unfairly low rates for advertisements and tried to use force with the newspapers. Three or four of the biggest shops combined and gave notice that they would take their advertising away unless the rates were lowered. After a little they drew in a few other lines of business with them, and suddenly one morning five or six full pages of advertisements were withdrawn from every newspaper in the city. The newspapers went on publishing all the news as usual, but people could hardly get their department stores, and waited. They made no countermove of any kind, and said nothing and several days elapsed past. They held to the claim that the service they performed in connecting great stores with the people of the city was a real service that represented a market value which could be proved and paid for. They kept on for another week publishing for the people all the news of the city except the news as to how they would spend their money. They wondered how long it would take the great stores to get their goods listed to see how it would work out net to let anybody know what the things were.

"The great shops tried other ways of letting people know. They tried hand bills, a huge, helpless paper of them all over the city. They used billboards, and posted huge lists of items for people to stop and read, in a street, if they wanted to, while they rushed by. For three whole weeks they held on tight to the idea that the newspapers were striking employees of the department stores. One would have thought they would have seen that the newspapers were the representatives of the people—almost the homes of the people—and that it would pay to treat them respectfully. One would have thought they would have seen that if they wanted space in the homes of the people—places at their very doors—where the newspapers had earned and acquired there, they would have to pay their share of what it had cost the newspapers to get it.

"One would have thought that the department stores would have seen that the newspapers were the more influential newspapers proper, the more influence the newspapers would have in the homes of the people, and the more business they could get through them. But it was not until the shop owners had come down and gazed after day on the big, white, lonely floors of their stores that they saw the truth. Crowds strayed away and proved it to them. Namely, a store, if it uses a great newspaper, instead of having a few feet of show windows on a street for people to walk by, gets practically miles of show windows for people—in their own houses—sell its goods—to the people—to the whole city—has its duties as well as its rights.

One would have thought, looking at it theoretically that the department stores in any city would have imagination enough to see, without having to shop that they save the truth. Crowds strayed away and proved it to them. Namely, a store, if it uses a great newspaper, instead of having a few feet of show windows on a street for people to walk by, gets practically miles of show windows for people—in their own houses—sell its goods—to the people—to the whole city—has its duties as well as its rights.

Honest Advertising is the Only Kind of Advertising that Pays.

Altogether Too Eloquent. Editor—We are sorry to lose your subscription, Mr. Jackson. What's the matter? Don't you like our politics? Miss Jackson—'Tain't dat, sah; 'tain't dat. 'Mah wife 'ar been and dun landed a job 'o' work for me by advertising in yob dabbled 'o' papah.

A Night of Terror.

Few sights are more terrible than that of a mother looking on her child choking and gasping for breath during an attack of croup, and nothing in the house to relieve it. Many mothers have passed nights of terror in this situation. A little forethought will enable you to avoid this. Chamberlain's Cough Remedy is a certain cure for croup and has never been known to fail. Keep it at hand. For sale by all dealers. adv.

A Can-worm Cough.

A cough that bothers you continually is one of the danger signs of a cold or consumption. Dr. King's New Discovery stops the cough, loosens the chest and lets you sleep peacefully. The first dose checks the symptoms and gives prompt relief. Mrs. A. F. Mertz, of Glen Ely, Iowa, writes: "Dr. King's New Discovery cured my cough and after six weeks' doctoring failed to help. Try it, it will do the same for you." Best medicine for coughs, colds, throat and lung troubles. Money back if it fails. Price 50c and \$1.00—all druggists or by mail, H. E. Bucklen & Co., St. Louis or Philadelphia. adv.

PICKED UP IN THE GARDEN AND ORCHARD.

Proflig Rhubarb Garden.

Strawberries may be set in August if the soil is in good condition and moist. This season has demonstrated the need of an irrigating plant of some sort where small fruits, especially strawberries, are to be raised. The American elm has many times demonstrated its superior value as a street or lawn tree. It is not nearly so subject to disease or insects as many other trees.

Black raspberries and dewberries are propagated by layering. The tips of the canes are bent over to the ground and covered with dirt to a depth of about four inches as soon as the fruiting season is past. It pays to put vegetables and fruits in clean, neat and attractive packages that are so on to the market. Two small well-graded and well-packed packages often bring double the price of a large package. It does not cost much more to pack in the smaller packages.

Don't stop cultivation in the flower or vegetable garden now. Keep the soil loose and weeds out. Cut out and burn the old canes from the raspberry hills as soon as they are through fruiting. This gives the new growth a chance. Nitrate of soda or dry hen manure scattered over the onion field when the bulbs are half or two-thirds grown will often increase the size and value of the bulb. Make the porch a livable place and spend as much time on it as you can spare from the inside work. Do your sewing and serve some meals and if possible sleep on the porch. No scheme of soil conservation can be successful unless it is profitable. Growing corn for its total feed value is better and more profitable than growing it for grain alone.

Too many folks who freely admit that there is wealth in the soil are content to take somebody's word for it. Whether sowing or reaping, the best way to succeed is to have a definite purpose in view and view nothing but this purpose. Get all the wood ashes you can and apply them to the garden and truck patch as soon as you can, and then plow it in. The dandelion has all along been a hard weed to will on account of its perennial nature. Many times, one hill will produce six eight-ounce potatoes; which is at the rate of \$20 per acre. Don't neglect to keep accurate farm accounts. Look to the future and correct the mistakes of the past. Without a record of the seasons and the cost of last year's crop, you cannot improve your management this year.

Pumpkins planted among the corn hills are no special hindrance to the crop if the ground is very rich. They are sometimes a great benefit in a dry season; the leaves and vines cover the ground and keep it from drying up after cultivation ceases. It is a law of nature that all plants must have a season of rest from active growth. In the tropics this is

JIMPSON WEED MADE USEFUL.

Planted Along Edges of Tobacco Field to Be Used in Poisoning Worm Moth With Cobalt Solution.

A Kentucky tobacco field with "Jimpson Weed" planted along the edges of the field, is shown in the accompanying illustration. The tobacco worm moth, with cobalt solution, is used in poisoning the tobacco plants. The moths frequent these flowers during the evening twilight and suck the juices found in them. Cobalt solution is made one ounce of cobalt to one pint of sweetened water. A few drops of this solution placed in the newly opened flowers of the Jimpson weed each day will destroy the moths as fast as they appear.

A Useful Weed.

Itch relieved in 30 minutes by Woodford's Sanitary Lotion. Never fails. Sold by Graham Drug Co. adv.

December cotton futures sold above 10 cents in New York Wednesday of last week for the first time this year.

Cause of Insomnia.

The most common cause of insomnia is disorders of the stomach and constipation. Chamberlain's Tablets correct these disorders and enable you to sleep. For sale by all dealers. adv.

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifles with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its use is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of
